

Test Strategy	Test Plan
<p>A Test strategy is a high-level document that defines an approach on how to test and approach testing at the organizational level.</p>	<p>A Test Plan is a granular level document defining what, how, and when to test the project level.</p>
<p>A test strategy sits on top of the test plan and the test plan takes clues from the test strategy on how testing will take place.</p>	<p>Intend is to write down all possible end-user flows. They are mapped and traceable to test scenarios.</p>
<p>An organization would have only one test strategy defining the overall organizational approach towards testing and test strategy would not change.</p>	<p>Whereas an organization could have multiple test plans customized as per the project requirement which can change and updated with time. A project can also have more than one test plan depending on the requirement. For e.g., a project could have a test plan to govern overall testing and an automation test plan for automation testing.</p>
