

A meteorologist believes that there is a relationship between the height above sea level,  $h$  m, and the air temperature,  $t^{\circ}\text{C}$ . Data is collected at the same time from 9 different places on the same mountain. The data is summarised in the table below.

$h$	1400	1100	260	840	900	550	1230	100	770
$t$	3	10	20	9	10	13	5	24	16

[You may assume that  $\sum h = 7150$ ,  $\sum t = 110$ ,  $\sum h^2 = 7\,171\,500$ ,  $\sum t^2 = 1716$ ,  $\sum th = 64\,980$  and  $S_r = 371.56$ ]

- (a) Calculate  $S_{th}$  and  $S_{hh}$ . Give your answers to 3 significant figures.

(3)
- (b) Calculate the product moment correlation coefficient for this data.

(2)
- (c) State whether or not your value supports the use of a regression equation to predict the air temperature at different heights on this mountain. Give a reason for your answer.

(1)
- (d) Find the equation of the regression line of  $t$  on  $h$  giving your answer in the form  $t = a + bh$ .

(4)
- (e) Interpret the value of  $b$ .

(1)
- (f) Estimate the difference in air temperature between a height of 500m and a height of 1000 m.

*An Introduction to the World of Work* David Spurling, 2016-02-24 Introduction to the World of Work Synopsis We have subdivided the modules into personal and business since this seems a logical approach Educationalists suggest an inductive approach to education is the best one where we go from the experience of the students to the underlying principles and therefore we have put in the personal modules first The objective of all the modules is both to help people within schools or colleges to be faced with realistic choices which can be answered if necessary in the classroom but also to provide material which can be used by young people working on their own Young people need to have transferable skills and some of these can be obtained by looking at the ways in which businesses approach them It is therefore worthwhile trying to build up a portfolio of ways in which businesses have these approaches and to see which ones are effective and why also which ones are totally misplaced

**Studies on the Teaching of Asian Languages in the 21st Century** Hüseyin İcen, Seniye Vural, 2014-03-26 In recent years there has been an increasing demand for and rapid development in the learning and teaching of Asian languages as a foreign language throughout the world Many governments recognize that Asian languages are of strategic economic importance and thus they are now offered as a foreign language by a great number of schools and higher education institutions This book contains chapters written by different authors from several countries on key issues and problems in the teaching of the Chinese Russian Farsi Japanese and Malaysian languages and some comparative studies The contributors here explore future directions in the teaching of Asian languages in the 21st century The ten chapters of the book have been prepared by the authors using the scholarly papers they presented at the Second International Symposium on Asian Languages and Literatures ADES which was held on 3-4 May 2012 at Erciyes University Kayseri Turkey under the title of Teaching of Asian Languages in the 21st Century

Philip Sloan, Willy Legrand, Clare Hindley, 2015-06-12 The issues surrounding the provision preparation and development of food products is fundamental to every human being on the planet. Given the scarcity of agricultural land, environmental pollution, climate change and the exponential growth of the world's population, where starvation and obesity are both widespread, it is little wonder that exploring the frontiers of food is now a major focus for researchers and practitioners. This timely Handbook provides a systematic guide to the current state of knowledge on sustainable food. It begins by analyzing the historical development surrounding food production and consumption, then moves on to discuss the current food crisis and challenges, as well as the impacts linked to modern agriculture and food security. Finally, it concludes with a section that examines emerging sustainable food trends and movements, in addition to an analysis of current food science innovations. Developed from specifically commissioned original contributions, the Handbook's inherent multidisciplinary approach paves the way for deeper understanding of all aspects linked to the evolution of food in society, including insights into local food, food and tourism, organic food, indigenous and traditional food, sustainable restaurant practices, consumption patterns and sourcing. This book is essential reading for students, researchers and academics interested in the possibilities of sustainable forms of gastronomy and gastronomy's contribution to sustainable development. The title includes a foreword written by Roberto Flore, Head Chef at the Nordic Food Lab, Copenhagen, Denmark. **Pearson Edexcel A level Business** Ian Marcouse, Andrew Hammond, Nigel Watson, 2019-08-12 Ian Marcous's accessible and engaging textbooks brought together in one updated volume covering everything your students need to know for the Pearson Edexcel A level Business specification.
