

Stage 1 – Desired Results

ESTABLISHED GOALS The enduring understandings and learning goals of the lesson, unit, or course.	Transfer <i>Students will be able to independently use their learning to...</i> Refers to how students will transfer the knowledge gained from the lesson, unit, or course and apply it outside of the context of the course.	
	Meaning	
	UNDERSTANDINGS <i>Students will understand that...</i> Refers to the big ideas and specific understandings students will have when they complete the lesson, unit, or course.	ESSENTIAL QUESTIONS Refers to the provocative questions that foster inquiry, understanding, and transfer of learning. These questions typically frame the lesson, unit, or course and are often revisited. If students attain the established goals, they should be able to answer the essential question(s).
	Acquisition	
	<i>Students will know...</i> Refers to the key knowledge students will acquire from the lesson, unit, or course.	<i>Students will be skilled at...</i> Refers to the key skills students will acquire from the lesson, unit, or course.

Stage 2 – Evidence and Assessment

Evaluative Criteria	Assessment Evidence
Refers to the various types of criteria that students will be evaluated on.	PERFORMANCE TASK(S): Refers to the authentic performance task(s) that students will complete to demonstrate the desired understandings or demonstrate they have attained the goals. The performance task(s) are typically larger assessments that coalesce various concepts and understandings like large projects or papers.
	OTHER EVIDENCE: Refers to other types of evidence that will show if students have demonstrated achievement of the desired results. This includes quizzes, tests, homework, etc. This is also a good point to consider incorporating self-assessments and student reflections.

Stage 3 – Learning Plan

Summary of Key Learning Events and Instruction

This stage encompasses the individual learning activities and instructional strategies that will be employed. This includes lectures, discussions, problem-solving sessions, etc.

Ubd Curriculum Guide In Science 3:

Towards Inclusion of All Learners through Science Teacher Education Michele Koomen, Sami Kahn, Christopher L. Atchison, Tiffany A. Wild, 2018-05-16 *Towards Inclusion of All Learners through Science Teacher Education* serves as an indispensable resource for teachers and teacher educators wishing to understand how to educate students with exceptionalities in science. This book begins with the voices and stories of the experts current and former K 12 students with disabilities sharing their experiences in science education classrooms. The voices of students with disabilities are then connected to the work of leading experts in the area of science education for individuals with disabilities in an effort to address the goals of national reform documents by ensuring rigorous science experiences for all students. It is written in a highly accessible and practical manner making it ideal for all educators including pre service and in service teachers teacher educators researchers and curriculum developers.

A Practitioner's Guide to Public Archaeology Elizabeth C. Reetz, Stephanie T. Sperling, 2024-08-19 Many archaeologists learn by trial and error while developing public programs and events and are mostly unaware that others in the profession are undergoing the same challenges. Archaeologists seldom receive professional development on K 12 pedagogy public engagement program design or assessment. For many in the field public outreach is often an under funded and under resourced extension of an already overwhelming workload yet this work is incredibly important. In *A Practitioner's Guide to Public Archaeology: Intentional Programming for Effective Outreach* more than thirty public archaeology practitioners will help you reduce the guesswork and stress behind program planning in this engaging and reader friendly handbook. A complement to the growing library of public archaeology publications the authors exclusively focus on key components of planning implementing and assessing public archaeology programming. Learn how to connect with your audience build an accessibility mindset create intentional goals and outcomes identify resources collaborators and other logistical needs and conduct assessments to better understand your impact. Discover ideas and techniques for all ages programming like public excavations site tours festivals and lectures K 12 presentations and events including formal and nonformal educational programs that occur inside and outside of a classroom and community based heritage management programs that include those designed for recurring participation by active trained volunteers. Throughout the book curated case study excerpts provide a diversity of perspectives and offer practical insights. The book concludes with a collection of logistics templates and real world examples to help you streamline your program preparation. Drawing from decades of experience you ll discover guidance on navigating challenges celebrating successes and lessons learned. Whether you are new to public archaeology or a seasoned expert this book offers valuable insights for all practitioners.

Pedagogies of Biomedical Science Donna Johnson, 2024-05-31 This book confronts the continually evolving nature of biomedical science education by providing a robust account of learning pedagogies and best practice for scholars and researchers in the field. Rather than considering subdisciplines of biomedical science education separately the volume

takes a holistic approach and considers the complexities of teaching biomedical science as a whole providing a nuanced overview of how a particular practice fits in such a course overall as well as providing support for development within the reader's own subdiscipline. Ultimately this holistic approach allows for expansive discussion of relevant pedagogical approaches that will directly inform innovations in the contemporary teaching of biomedical science education. Novel in approach and underpinned by the latest in research innovations this book will appeal to scholars, researchers and postgraduate students in the fields of medical education, higher education and curriculum studies. Policy makers involved with health education and promotion as well as educational research will also benefit from the volume.

Dancing in the Light Marcia Behrenbruch, 2012-11-04

Sustainability, globalization, the rapid growth of knowledge and the need for internationally minded citizens require a rethinking of education. Concept-based inquiry learning has been offered for over a century as an alternative to traditional education centered on textbooks, invasive standardized testing and control external to the student. Yet the widespread change in teaching styles required to shift education to meet 21st century requirements has been sporadic at best. This book tells several stories. The first is a teacher's journey to discover a different way of teaching and learning. The second is a summary of the theory used to explain and justify the change in pedagogy to the wider school community. The third are stories from student and teachers who practice inquiry learning. The result is a description of 6 essential elements for a successful inquiry learning environment. Although this research was conducted at a single school, it offers important insights for other schools who are considering change to a more constructivist, sustainable approach to education. Marcia Behrenbruch has taught at all levels of schooling from the early years to year 12. She has lived and worked in Canada, the Netherlands, Australia, Vietnam and Singapore. Most of her 15 years in school administration focused on curriculum innovation and facilitating change. She completed her doctoral studies at Melbourne Graduate School of Education and is currently a global head of professional development for an international not-for-profit educational organization.

Understanding by Design Grant P. Wiggins, Jay McTighe, 2005

What is understanding and how does it differ from knowledge? How can we determine the big ideas worth understanding? Why is understanding an important teaching goal and how do we know when students have attained it? How can we create a rigorous and engaging curriculum that focuses on understanding and leads to improved student performance in today's high-stakes, standards-based environment? Authors Grant Wiggins and Jay McTighe answer these and many other questions in this second edition of *Understanding by Design*. Drawing on feedback from thousands of educators around the world who have used the UbD framework since its introduction in 1998, the authors have greatly revised and expanded their original work to guide educators across the K-16 spectrum in the design of curriculum, assessment and instruction. With an

improved UbD Template at its core the book explains the rationale of backward design and explores in greater depth the meaning of such key ideas as essential questions and transfer tasks Readers will learn why the familiar coverage and activity based approaches to curriculum design fall short and how a focus on the six facets of understanding can enrich student learning With an expanded array of practical strategies tools and examples from all subject areas the book demonstrates how the research based principles of Understanding by Design apply to district frameworks as well as to individual units of curriculum Combining provocative ideas thoughtful analysis and tested approaches this new edition of Understanding by Design offers teacher designers a clear path to the creation of curriculum that ensures better learning and a more stimulating experience for students and teachers alike
