Student and Teacher Writing Motivational Beliefs Steve Graham, Gary A. Troia, Gustaf Bernhard Uno Skar, 2024-06-21. The study of students' motivational beliefs about writing and how such beliefs influence writing has increased since the publication of John Hays' 1996 model of writing. This model emphasized that writers' motivational beliefs influence how and what they write. Likewise, increased attention has been devoted in recent years to how teachers' motivational beliefs about writing, especially their efficacy to teach writing, impact how writing is taught and how students progress as writers. As a result, there is a need to bring together in a Research Topic studies that examine the role and influence of writing beliefs. Historically, the psychological study of writing has focused on what students write or the processes they apply when writing. Equally important but investigated less often are studies examining how writing is taught and how teachers' efforts contribute to students' writing. What has been less prominent in the psychological study of writing are the underlying motivational beliefs that drive or inhibit students' writing or serve as catalysts for teachers' actions in the classroom when teaching writing. This Research Topic will bring together studies that examine both students' and teachers' motivational beliefs about teaching writing. This will include studies examining the operation of such beliefs, how they develop, cognitive and affective correlates, how writing motivational beliefs can be fostered, and how they are related to students' writing achievement. By focusing on both students' and teachers' beliefs, the Research Topic will provide a more nuanced and broader picture of the role of motivation beliefs in writing and writing instruction. This Research Topic includes papers that address students' motivational beliefs about writing, teachers' motivational beliefs about writing or teaching writing. Students' motivational beliefs about writing include beliefs about the value and utility of writing, writing competence, attitudes toward writing, goal orientation, motives for writing, identity, epistemological underpinnings, writing and attributions for success/failure, as examples. Teachers' motivational beliefs include these same judgements as well as beliefs about their preparation and their students' competence and progress as writers to provide additional examples. This Research Topic is interested in papers that examine how such beliefs operate, develop, are related to other cognitive and affective variables, how they are impacted by instruction, and how they are related to students' writing performance. Submitted studies can include original research, both quantitative, qualitative, or mixed methods, meta-analysis, and reviews of the literature.

Johannine and Synoptic traditions and the socio religious context of the Fourth Gospel Borgen's work argues hard for a unitive view of the Johannine text Rather than seeing John's story of Jesus as an amalgam of disparate sources or as dependent on the Synoptics Borgen explores a number of commonalities between contemporary Jewish writings including the writings of Philo and haggadic midrashim In so doing new glimpses are also availed onto the dialectical Johannine situation including an antidocetic thrust as well as Johannine synagogue engagements The enduring impact of Borgen's work shows the Fourth Gospel to represent a self standing tradition characterized by Jewish engagements of biblical texts contributing to homiletic expansions upon memories of the ministry of Jesus for later generations From the Foreword by Paul N Anderson

The Campus Rape Frenzy KC Johnson, Stuart Taylor, Jr., 2018-05-22 In recent years politicians led by President Obama and prominent senators and governors have teamed with extremists on campus to portray our nation's institutions of higher learning as awash in a violent crime wave and to suggest preposterously that university leaders professors and students are indifferent to female sexual assault victims in their midst Neither of these claims has any bearing to reality But they have achieved widespread acceptance thanks in part to misleading alarms from the Obama administration and biased media coverage led by The New York Times The frenzy about campus rape has helped stimulate and has been fanned by ideologically skewed campus sexual assault policies and lawless commands issued by federal bureaucrats to force the nation's all too compliant colleges and universities essentially to presume the guilt of accused students The result has been a widespread disregard of such bedrock American principles as the presumption of innocence and the need for fair play This book uses hard facts to set the record straight It explores among other things nearly two dozen of the cases since 2010 in which students who in all likelihood would have or have subsequently been found not guilty in a court of law have in a lopsided process been hastily and carelessly branded as sex criminals and expelled or otherwise punished by their colleges often after being tarred and feathered by their fellow students And it shows why all students and eventually society as a whole are harmed when our nation's universities abandon pursuit of truth and seek instead to accommodate the passions of the mob As detailed in the new Epilogue some encouraging events have transpired since this book was first published in October 2016 A majority of the judicial rulings in dozens of lawsuits by male students claiming their schools treated them unfairly and discriminated against them based on their gender have rebuked the schools for their handling of these cases And Education Secretary Betsy DeVos called for fairness to accused students and accusers alike revoked most of the guilt presuming Obama era policies and began a protracted rule making process designed to compel procedural fairness and nondiscrimination
