Singing Under Ice:

Singing Under Ice M. Grace Mersereau, 1994 Ethology and Behavioral Ecology of Mysticetes Christopher W. Clark, Ellen C. Garland, 2022-07-02 In this book an international team of leading marine mammal scientists with a remarkably diverse set of backgrounds and areas of expertise lead you through a synthesis of current knowledge on baleen whales. Baleen whales are the largest animals ever to have lived on this planet. They also have the lowest and most intense voices on Earth, most likely evolved to take advantage of ocean acoustic transmission conditions so as to be detectable across ocean basins. Some baleen whales can live to be 150-200 years old. They migrate many thousands of kilometers between feeding and breeding areas. They produce songs and calls that serve as behavioral foundations for establishing, maintaining, and expanding their cultural identities. To conclude that we know the behavioral limits of these large-brained, long-lived animals would be naive. As baleen whale scientists, we are still beginning to comprehend the enormous complexities and natural histories of these remarkable animals. Today the fact that whales sing is known throughout much of the world. This awareness started 50 years ago with the publication and popularization of a collection of humpback song recordings that motivated research into baleen whale behavioral ethology. In this book's chapters, a reader's experiences will stretch from learning about baleen whale laryngeal anatomy associated with their different voices to learning about the vast ocean areas over which their voices can be heard and the emerging complexities of their culturally defined societies. These are accompanied by chapters on the fundamental ethological contexts of socializing, migrating, and foraging. Two common themes permeate the book. One theme highlights the phenomenal increase in scientific knowledge achieved through technological advancements. The other theme recognizes the impacts of human-made activities on ocean acoustic environments and the resultant influences on the health and survival of individual whales and their populations. Although the book is intentionally ambitious in its scope, as scientists, we fully recognize that baleen whale science is still in its infancy. Many profound revelations await discovery by cohorts of young, multi-talented explorers, some of whom are stretching their wings in this volume and some of whom are reading these scientific stories for the first time.

The Bursting Test Linda Rogers, 2002. These poems test the capacity of individuals, families, communities, and the earth itself to stand the pressures of modern life. They walk the tightrope over the chasm between male and female love and hate, child and adult, war and peace, and now and forever, attempting to find balance and reconcile the one with the many.
