Un Report Unama 20suicide:

Driven to Death Ariel Merari, 2010-12-02 The deepest study yet of one of the least understood phenomena of our time A scholarly work that read like a page turner Bob Simon CBS News Chief Middle Eastern correspondent and recipient of the Edward Weintal Prize for Diplomatic Reporting *Insurgents, Terrorists, and Militias* Richard H. Shultz, Andrea J. Dew, 2009 By focusing on four specific hotbeds of instability Somalia Chechnya Afghanistan and Iraq Richard H Shultz Jr and Andrea J Dew carefully analyze tribal culture and clan associations examine why traditional or tribal warriors fight identify how these groups recruit and where they find sanctuary and dissect the reasoning behind their strategy Their new introduction evaluates recent developments in Iraq and Afghanistan the growing prevalence of Shultz and Dew s conception of irregular warfare and the Obama Defense Department s approach to fighting insurgents terrorists and militias War in the post Cold War era cannot be waged through traditional Western methods of combat especially when friendly states and outside organizations like al Qaeda serve as powerful allies to the enemy Bridging two centuries and several continents Shultz and Dew recommend how conventional militaries can defeat these irregular yet highly effective organizations *Armed groups: Studies in National Security, Counterterrorism, and Counterinsurgency* Jeffrey H. Norwitz, 2008 Discussion of armed groups which are considered to include classic insurgents terrorists guerrillas militias police agencies criminal organizations war lords privatized military organizations mercenaries pirates drug cartels apocalyptic religious extremists orchestrated rioters and mobs and tribal factions To study armed groups use of history political science anthropology sociology theology and economics are traditional areas of research The book also delves into matters of ethics technology intelligence education the law diplomacy military science and even mythology The book is divided into five sections History and armed groups Present context and environment Religion and inspiration thinking differently about armed groups the shape of things to come

Old and New Terrorism Peter Neumann, 2009-08-10 Offers a picture of the shifts in the practice and reception of terrorism and analyses how globalization has facilitated many of the changes *Pirates, Terrorists, and Warlords* Jeffrey H. Norwitz, 2009-07-01 Pirates warlords guerillas criminal organizations drug cartels apocalyptic religious extremists police agencies terrorists these are classic insurgents whose past present and future is dissected in this important book Contributing writers including Martha Crenshaw T X Hammes Russell Howard Gene Cristy Yosef Kuperwasser and academics from Naval War College Marine Corps War College and Stanford University explore important insurgency related issues such as domestic terrorism globalization of armed groups children on the battlefield religious influence on armed fights and more This rich anthology offers scholars and citizens a new way to think about national and international security as it stands today and its future *The Making of Pakistani Human Bombs* , Khuram Iqbal, 2015-10-30 A multi level analysis of Pakistani human bombs reveals that suicide terrorism is caused by multiple factors with perceived effectiveness vengeance poverty and religious fundamentalism playing a varying role at the individual organizational and environmental

levels Nationalism and resistance to foreign occupation appear as the least relevant factors behind suicide terrorism in Pakistan The findings of this research are based on a multi level analysis of suicide bombings incorporating both primary and secondary data In this study the author also decodes personal demographic economic and marital characteristics of Pakistani human bombs On average Pakistani suicide bombers are the youngest but the deadliest in the world and more than 71 percent of their victims are civilians Earlier concepts of a weak link linking terrorism with poverty and illiteracy do not hold up against the recent data gathered on the post 9 11 generation of fighters in Pakistan in suicidal and non suicidal categories as the majority of fighters from a variety of terrorist organizations are economically deprived and semi literate The majority of Pakistani human bombs come from rural backgrounds with very few from major urban centres Suicide bombings in Pakistan remain a male dominated phenomenon with most bombers being single men Demographic profiling of Pakistani suicide bombers based on a random sample of 80 failed and successful attackers dents the notion that American drone strikes play a primary role in promoting terrorism in all its manifestations The study concludes that previous scholarly attempts to explain suicide bombings are largely based on Middle Eastern data thus their application in the case of Pakistan can be misleading The Pakistani case study of suicide terrorism demonstrates unique characteristics hence it needs to be understood and countered through a context specific and multi level approach
