| L60E Volvo | | | |

Wheel loaders L60E, L70E och L90E have articulated frame steering and four-wheel drive.

The engine is a six-cylinder, four-stroke, direct-injection, turbocharged diesel engine of the type D6D.

The transmission is hydro-mechanical where all gears are in constant mesh. Its type designation is HT93 for L60E, HT95 for L70E and HTE202 for L90E.

There is a single-stage hydraulic torque converter between the engine and the transmission.

Front and rear axles have fully floating drive shafts with planetary gears in the wheel hubs. The front axle is equipped with a differential lock.

The service brake is a disc brake with disc brake pads in each wheel hub.

The parking brake on L60E and L70E is a disc brake positioned externally on the front output shaft of the transmission. On L90E the parking brake is positioned internally on the front output shaft of the transmission.

The steering system is hydrostatic with a variable load-sensing axial piston pump and two hydraulic cylinders (steering cylinders).
