Post Mortem Technique Handbook Michael T. Sheaff, Deborah J. Hopster, 2013-03-09 The relentless decline in the hospital based autopsy has been documented elsewhere in detail and has been generally deplored as a loss of an important method of quality control at a time when the practise of Medicine is closely scrutinised This is not the place to revisit these well rehearsed arguments but the change itself provides a powerful justification for the production of this book The decrease in clinically requested autopsies in hospitals leaves a large and increasing number of Coronial autopsies to be done many of these in circumstances of discontent with some aspect of the medical or other management of the events which ultimately lead to death The pathologists now performing these autopsies will not have had the amount of experience that was commonplace among their predecessors an experience of carrying out procedures which although devised for different purposes can provide a more complete examination of the whole body than often appears necessary in straightforward deaths in the community In my first two years in Pathology I performed 200 autopsies most of my contemporaries will have had a similar grounding it would not be possible to provide this experience for staff in training now except in some parts of the European mainland So there is a need to provide a written but practical account of the autopsy which will help those who may find themselves in unfamiliar territory

Autopsy Pathology Walter E. Finkbeiner, Philip C. Ursell, Richard L. Davis (M.D.), 2009-01-01 The autopsy past and present Legal social and ethical issues Autopsy biosafety Basic postmortem examination Postmortem examination of fetuses and infants Special dissection procedures Autopsy photography and radiology Microscopic examination Supplemental laboratory studies The autopsy report Postmortem examination in cases of sudden death due to natural causes Postmortem examination in cases of sepsis or multiple organ dysfunction Death certification Medical quality improvement and quality assurance of the autopsy Atlas of autopsy pathology

The Hospital Autopsy Julian Burton, Guy Rutt, 2010-06-25 Now in full colour this new and revised edition of The Hospital Autopsy presents a clear and systematic approach to safe and effective modern autopsy practice for pathologists It begins by discussing issues such as legislation governing autopsies religious attitudes and ensuring safety before covering the procedures of external examination

Advanced Histopathology Gordon W.H. Stamp, N.A. Wright, 2012-12-06 It is easy to be confident that an appropriate body of advice is available to candidates about the content of an examination once you have passed it Prospectively the Primary and Final Examinations of the Royal College of Pathologists will appear to most to involve the assimilation of what seems at the time an inexhaustible volume of data and the recent change in the College examination system has not diminished this concern for the majority of candidates The guidelines for training for the new Part I examination state that this is the major hurdle of the MRCPATH and it is clear that it will determine whether candidates are suitable for training which will permit them to practise independently as consultants after Part II These general aims and objectives do not answer questions such as How much do I need to know about glomerulonephritis or Where do I stop with

the lymphomas This text attempts to resolve the difficulty of knowing what standard to aim at using College questions as its starting point It concentrates on the essential basis of any single answer many candidates for the new three year examination will know more about individual topics than is stated here However it is the breadth of information required which is a feature of College examinations and this text should help with this problem
