## **Postmetropolis Critical Studies Of Cities And Regions:**

**Postmetropolis** Edward W. Soja, 2000-05-18 This completes Ed Soja's trilogy on urban studies which began with *Postmodern Geographies* and continued with *Thirdspace*. It is the first comprehensive text in the growing field of critical urban studies to deal with the dramatically restructured megacities that have emerged world wide over the last half of the twentieth century.

**City/Art** Rebecca Biron, 2009-07-17 An interdisciplinary collection exploring how creative practices broadly conceived to encompass urban design, museums, graffiti, film, music, literature, architecture, and performance art continually reconstruct the urban scene in Latin America.

**Cities, Regions and Flows** Peter V. Hall, Markus Hesse, 2013 *Cities, Regions and Flows* presents a theoretical framework for understanding the changing relationship between places and physical movement and thoughtfully prepared case studies from five continents on how cities relate to value chains and how they ensure accessibility and urban liveability in an increasingly contested policy environment. Moreover, the book discusses how urban policies attempt to solve related conflicts in terms of infrastructure provision, land use, local labour markets, and environmental sustainability. The two subsystems that are of major interest here are urban regions on the one hand and logistics management and physical distribution on the other, which develop in quite distinct and often contradictory ways. Whereas urban regions face disintegration due to the expansion of the built environment and the spatio-temporal fragmentation of life worlds and regional systems, the logistics system itself demands integration in order to keep flows moving and to reduce costs. Physical flows, networks, and chains thus have a fundamental impact on urban restructuring.

**The Wiley-Blackwell Encyclopedia of Urban and Regional Studies** Anthony M. Orum, 2019-04-15 Provides comprehensive coverage of major topics in urban and regional studies. Under the guidance of Editor in Chief Anthony Orum, this definitive reference work covers central and emergent topics in the field through an examination of urban and regional conditions and variation across the world. It also provides authoritative entries on the main conceptual tools used by anthropologists, sociologists, geographers, and political scientists in the study of cities and regions. Among such concepts are those of place and space, geographical regions, the nature of power and politics in cities, urban culture, and many others. *The Wiley-Blackwell Encyclopedia of Urban and Regional Studies* captures the character of complex urban and regional dynamics across the globe, including timely entries on Latin America, Africa, India, and China. At the same time, it contains illuminating entries on some of the current concepts that seek to grasp the essence of the global world today, such as those of Friedmann and Sassen on global cities. It also includes discussions of recent economic writings on cities and regions, such as those of Richard Florida. Comprised of over 450 entries on the most important topics and from a range of theoretical perspectives, it features authoritative entries on topics ranging from gender and the city to biographical profiles of figures like Frank Lloyd Wright. Takes a global perspective with entries providing coverage of Latin America and Africa, India and China, and the US and Europe. Includes biographies of central figures in urban and regional studies such as Doreen Massey, Peter Hall, Neil Smith, and Henri Lefebvre. *The Wiley*

Blackwell Encyclopedia of Urban and Regional Studies is an indispensable reference for students and researchers in urban and regional studies urban sociology urban geography and urban anthropology

**A Research Agenda for Cities** John Rennie Short, 2017-03-31 Elgar Research Agendas outline the future of research in a given area Leading scholars are given the space to explore their subject in provocative ways and map out the potential directions of travel They are relevant but also visionary This book provides a critical assessment of key areas of urban scholarship In twelve stimulating chapters expert contributors examine a range of important pressing topics from sustainability and gentrification to feminist interventions and globalization to security and food issues Six more regionally informed expert reviews examine recent urban research in sub Saharan Africa South America East Asia the Middle East Australia and Eastern Europe The chapters provide polemical assessments and signposts for future research The book will be an indispensable and accessible guide to urban research across the globe

**Critical Reflections on Cities in Southeast Asia** Tim Bunnell, Lisa Drummond, Ho, 2021-11-15 Critical Reflections draws together the multi disciplinary research of scholars working in on cities across Southeast Asia The fourteen essays collected in the volume are organised into three thematic sections re conceptualisation competition and intervention Collectively these reflections contribute to and interrogate the expanding urban and regional studies literature The volume constitutes a critical corrective to the existing literature which all too often seeks to diagnose contemporary urban trends everywhere from a small number of mostly Western paradigmatic cases Yet while acknowledging the increasing interconnectedness and shared global orientation of most cities in Southeast Asia the volume is wary of positing an equally generalising regional model Individually these essays attend to the diversity of contemporary urban experiences in Southeast Asia

**Cities in the 21st Century** Oriol Nel-lo, Renata Mele, 2016-02-19 Cities in the 21st Century provides an overview of contemporary urban development Written by more than thirty major academic specialists from different countries it provides information on and analysis of the global network of cities changes in urban form environmental problems the role of technologies and knowledge socioeconomic developments and finally the challenge of urban governance In the mid 20th century architect and planner Josep Llu s Sert wondered if cities could survive in the early 21st century we see that cities have not only survived but have grown as never before Cities today are engines of production and trade forges of scientific and technological innovation and crucibles of social change Urbanization is a major driver of change in contemporary societies it is a process that involves acute social inequalities and serious environmental problems but also offers opportunities to move towards a future of greater prosperity environmental sustainability and social justice With case studies on thirty cities in five continents and a selection of infographics illustrating these dynamic cities this edited volume is an essential resource for planners and students of urbanization and urban change

Governance and Planning of Mega-City Regions Jiang Xu, Anthony Yeh, 2010-09-13 Neoliberalism s market revolution has had a tremendous effect on contemporary mega city regions The negative consequences of market oriented politics for

territorial growth have been recognized While a lot of attention has been given to how planners and policy makers are fighting back political fragmentation through innovative governance and planning little has been done to reveal such practices through an international comparative perspective Governance and Planning of Mega City Regions provides a comparative treatment and examination of how new approaches in governance and planning are reshaping mega city regions around the world The contributors highlight how European mega city regions are evolving and how strategic intervention is being redefined to enable the integration of urban qualities in a multi level governance environment how traditional federal countries in North America and Australia see the promise of major policies and development initiatives finally moving ahead to herald a more strategic intervention at national and regional scales and how transitional economies in China witness the rise of state strategies to control the articulation of scales and to reassert the functional importance of state in a growing diffused power context This book offers case studies written from a variety of theoretical and political perspectives by world leading scholars It will appeal to upper level undergraduates postgraduates researchers and policymakers interested in urban and regional planning geography sociology public administrations and development studies Urbanism Laboratory for Cities and Regions Meta Berghauser Pont,F. van der Hoeven,Jürgen Rosemann,2007 The conditions of urban development changes radically Technological transformations such as automation and robotization in industrial production are leading to operating conditions for businesses and employees Transportation and distribution systems are changing the scale and flow patterns of the urban agglomerations Handbook of Cities and the Environment Kevin Archer,Kris Bezdecny,2016-12-30 With an ever growing majority of the world s human population living in city spaces the relationship between cities and nature will be one of the key environmental issues of the 21st Century This book brings together a diverse set of authors to explore the various aspects of this relationship both theoretically and empirically Rather than considering cities as wholly separate from nature a running theme throughout the book is that cities and city dwellers should be characterized as intrinsic in the creation of specifically urban generated socio natures *Working Capital* Nick Buck,Ian Gordon,Peter Hall,Michael Harloe,Mark Kleinman,2013-09-13 For decades the cities of the developed world were seen as problem beset relics from times of low mobility and slow communications But now their potential to sustain creativity culture and innovation is perceived as crucial to success in a much more competitive global economy The vital requirement to secure and sustain this success is argued to be the achievement of social cohesion Working Capital provides a rigorous but accessible analysis of these key issues taking London as its test case The book provides the first substantial analysis of key economic social and structural issues that the new London administration needs to deal with In a wider context its critical assessment of the bases of the new urbanism and of the global city thesis will raise questions both about the adequacy of urban thinking and about the capacity of new institutions alone to resolve the fundamental problems faced by cities *City Suburbs* Alan Mace,2013-03-05 The majority of the world s population is now urban and for most this will mean a life lived in

the suburbs City Suburbs considers contemporary Anglo American suburbia drawing on research in outer London it looks at life on the edge of a world city from the perspective of residents Interpreted through Bourdieu s theory of practice it argues that the contemporary suburban life is one where place and participation are in combination strong determinants of the suburban experience From this perspective suburbia is better seen as a process an on going practice of the suburban which is influenced but not determined by the history of suburban development How residents engage with the city and the legacy of particular places combine powerfully to produce very different experiences across outer London In some cases suburban residents are able to combine the benefits of the city and their residential location to their advantage but in marginal middle class areas the relationship with the city is more circumspect as the city represents more threat than opportunity The importance of this relational experience with the city informs a call to integrate more fully the suburbs into studies of the city

**The spatial strategies of Italian regions** Vinci,2014-04-04      **The Student's Companion to Geography** Alisdair Rogers,Heather A. Viles,2002-11-22 This essential guide to studying geography has been updated to ensure it remains a valuable resource for all those on geography courses as well as those considering studying the subject at university Second edition of this popular and wide ranging guide to studying geography Includes contributions from many key geographers around the world Provides answers to questions from before starting a degree course right through to further study and careers Includes lots of practical tips for improving geographical study and research skills Fully revised and updated to ensure it remains an invaluable resource for students      **Learning cities in a knowledge based society** ,2010      *Urban Regionalisation Processes* Francesco Lo Piccolo,Marco Picone,Vincenzo Todaro,2021-01-28 This book explores the issues of transformation phenomena of the urban dimension regionalization processes that traditional scientific literature fails to describe appropriately So far scholars have adopted a widespread dominant perspective that proved unable to grasp the essence of post modern complexities that urban spaces imply The book provides a taxonomy in order to describe the rules of these new and peculiar cities by using the living dimension as a device for the epistemological breaking down of traditional socio spatial analyses After a thorough theoretical introduction it describes two Sicilian case studies that prove particularly relevant to the construction of a new alternative urban regionalization theory These two areas Palermo and South Eastern Sicily are described through several aspects such as the role of migrants and migrations in defining urban regionalization the power of fiction and the new urban forms that are slowly emerging in Sicily Overall this book provides a refreshing view of what Sicily has been and is becoming by deconstructing most of its clichés and suggesting theoretical perspectives grounded in both quantitative and qualitative analyses      *Handbook on the Geographies of Regions and Territories* Anssi Paasi,John Harrison,Martin Jones,2018-07-27 This new international Handbook provides the reader with the most up to date and original viewpoints on critical debates relating to the rapidly transforming geographies of regions and territories as well as related key concepts such as place scale networks and regionalism Bringing together renowned specialists who have

extensively theorized these spatial concepts and contributed to rich empirical research in disciplines such as geography sociology political science and IR studies this interdisciplinary collection offers fresh cutting edge and contextual insights on the significance of regions and territories in today s dynamic world Parallel Patterns of Shrinking Cities and Urban Growth Rocky Piro,2016-05-06 Focussing particularly on urban fringe and rural areas this book addresses the parallel phenomena of growth and decline In doing so it not only broadens a debate which generally concentrates on urban municipalities especially inner city areas but also covers new ground by starting to build a new theoretical framework for the spatial planning related assessment of these phenomena Bringing together contributions from internationally renowned authors such as Sir Peter Hall Steve Ward and Johann Jessen the book compares international case studies and highlights their relationships with one another It concludes by emphasizing common themes that are addressed as well as showing applicability to other urban and rural regions Overall the book provides a timely and comprehensive analysis of the spatial consequences and related spatial planning concepts in theory and practice which aim to further sustainable development of city regions urban fringe and rural areas experiencing growth and decline International Encyclopedia of Human Geography ,2009-07-16 The International Encyclopedia of Human Geography provides an authoritative and comprehensive source of information on the discipline of human geography and its constituent and related subject areas The encyclopedia includes over 1 000 detailed entries on philosophy and theory key concepts methods and practices biographies of notable geographers and geographical thought and praxis in different parts of the world This groundbreaking project covers every field of human geography and the discipline s relationships to other disciplines and is global in scope involving an international set of contributors Given its broad inclusive scope and unique online accessibility it is anticipated that the International Encyclopedia of Human Geography will become the major reference work for the discipline over the coming decades The Encyclopedia will be available in both limited edition print and online via ScienceDirect featuring extensive browsing searching and internal cross referencing between articles in the work plus dynamic linking to journal articles and abstract databases making navigation flexible and easy For more information pricing options and availability visit [http://info.sciencedirect.com/content/books/ref\\_works](http://info.sciencedirect.com/content/books/ref_works) coming Available online on ScienceDirect and in limited edition print format Broad interdisciplinary coverage across human geography Philosophy Methods People Social Cultural Political Economic Development Health Cartography Urban Historical Regional Comprehensive and unique the first of its kind in human geography The Making of Grand Paris Theresa Enright,2016-07-29 A critical examination of metropolitan planning in Paris the Grand Paris initiative and the building of today s networked global city In 2007 the French government announced the Grand Paris initiative This ambitious project reimagined the Paris region as integrated balanced global sustainable and prosperous Metropolitan solidarity would unite divided populations a new transportation system the Grand Paris Express would connect the affluent city proper with the low income suburbs streamlined institutions would replace fragmented

governance structures Grand Paris is more than a redevelopment plan it is a new paradigm for urbanism In this first English language examination of Grand Paris Theresa Enright offers a critical analysis of the early stages of the project considering whether it can achieve its twin goals of economic competitiveness and equality Enright argues that by orienting the city around growth and marketization Grand Paris reproduces the social and spatial hierarchies it sets out to address For example large expenditures for the Grand Paris Express are made not for the public good but to increase the attractiveness of the region to private investors setting off a real estate boom encouraging gentrification and leaving many residents still unable to get from here to there Enright describes Grand Paris as an example of what she calls grand urbanism large scale planning that relies on infrastructural megaprojects to reconfigure urban regions in pursuit of speculative redevelopment Democracy and equality suffer under processes of grand urbanism Given the logic of commodification on which Grand Paris is based these are likely to suffer as the project moves forward
