Pour Une Sociologie Historique De La Quantification Largument Statistique I:

Pour une sociologie historique de la quantification Alain Desrosières, 2008 La quantification est devenue un signe d objectivité de rigueur et d impartialité mobilisant dans des situations très variées depuis le début politique jusqu'à la démonstration scientifique en passant par les indicateurs d'entreprise ou la mesure de l'opinion publique. Or la quantification sous ses différents formats statistiques ne se contente pas de fournir un reflet du monde, elle crée une nouvelle façon de le penser pour le représenter de l'exprimer et d'agir sur lui à la fois par la puissance de ses modèles et de ses procédures par leur diffusion et par leurs usages argumentatifs. Ce livre montre comment s'est historiquement construit l'argument statistique et quels sont aujourd'hui les effets cognitifs et sociaux des dispositifs de quantification. Il ne s'adresse pas uniquement aux sociologues aux historiens de sciences et aux statisticiens soucieux d'une réflexion sur leurs pratiques et leur histoire mais aussi tous les citoyens confrontés aux appareils statistiques et mesurés par eux.

Statistics, Public Debate and the State, 1800-1945 Jean-Guy Prevost, Jean-Pierre Beaud, 2015-10-06 Based around a number of illustrative case studies this book charts the development of our modern day reliance on statistics. Topics covered include scientific innovations administrative issues and the use of numbers in politics. By looking at these aspects of statistics together the authors are able to present a truly original work.

A Political Economy of the Measurement of Inflation Florence Jany-Catrice, 2021-01-12 Inflation should no longer be a politically sensitive indicator. Indeed since the early 1980s macroeconomic policies have managed to contain it. Yet the consumer price index CPI which is the main indicator for measuring inflation remains very frequently consulted by citizens due to its multiple uses. The CPI is used for indexing wages, pensions, but also various contracts such as food pensions. It is also used by National Accounts to deflate macroeconomic values and to provide data in real terms. But how is this CPI measured? What reforms have happened to give shape to the XXIst century CPI? This book presents the CPI based on the study of the controversies that have marked its history. Set in both the socio-economic and ideas contexts these controversies show the eminently conventional and political nature of the CPI and therefore of many other macroeconomic indicators such as growth or productivity.

Research Handbook on Public Sociology Lavinia Bifulco, Vando Borghi, 2023-05-09 Engaging with the key debates and issues in a continuously evolving field Lavinia Bifulco and Vando Borghi bring together contributions from leading social scientists to debate the enduring relevance of public sociology in light of ongoing changes in the social world.

Gouverner par les nombres Alain Desrosières, 2008 Le gouvernement des hommes utilise et abuse de l'argument statistique. Avec l'émergence d'un état national, l'action publique s'appuie de plus en plus sur des indicateurs chiffrés qui fournissent des évaluations de la performance des différentes actions politiques. Des palmarès variés connaissent une grande diffusion souvent sous l'appellation anglo-américaine de benchmarking en hiérarchisant les pays, les universités et même les nations. Ce passage par la quantification loin de fournir une image neutralisée des phénomènes les transforme et les transforme. Ce livre propose des

tudes de cas précis enquêtes sur le budget des familles commissions du plan statistiques locales ou comptabilité nationale analysant la production des statistiques publiques et leur usages par les autorités publiques Et l'on verra comment la statistique s'est imposée à la fois comme un outil de preuve dans les sciences empiriques et comme un outil de gouvernement selon l'intuition que Foucault avait déjà prétendu dans les années 1970 sous le nom de gouvernementalité Quantifying International Conflicts Louise Beaumais, Iris Lambert, Thomas Lindemann, Sami Makki, Frédéric Ramel, Eric Sangar, 2025-08-24

Based on the Datawar research program developed by three French academic institutions this book seeks to explore the following research question how do social practices of data collection and analysis in quantitative conflict studies influence researchers and practitioners' representations of armed conflict The editors and authors investigate both scientific practices in the field of quantitative conflict studies and the impact of these practices on practitioners' vision of war covering the full lifecycle of quantitative conflict data from collection and analysis to their use and dissemination by military and diplomatic institutions humanitarian organizations and the media Measuring African Development Morten

Jerven, 2016-04-14 The chief economist for the World Bank's Africa region Shanta Devarajan delivered a devastating assessment of the capacity of African states to measure development in his 2013 article Africa's Statistical Tragedy Is there a statistical tragedy unfolding in Africa now If so then examining the roots of the problem of provision of statistics in poor economies is certainly of great importance This book on measuring African development in the past and in the present draws on the historical experience of colonial French West Africa Ghana Sudan Mauritania and Tanzania and the more contemporary experiences of Ethiopia and the Democratic Republic of Congo The authors each reflect on the changing ways statistics represent African economies and how they are used to govern them This book was published as a special issue of the Canadian Journal of Development Studies **Féminisme et management** Collectif

Collectif, 2025-07-16T00:00:00-04:00 Qu'il s'agisse de relecture des imaginaires de genre dans les organisations d'analyse des normes de genre ou des luttes féministes elles mêmes d'enjeux de traduction linguistiques conceptuels ou politiques toutes les réflexions de ce livre ont en commun de dénoncer l'assignation de genre des places et des rôles dans la société et dans les entreprises Quantifier la GRH, un enfermement dans le déterminisme technique ? Clotilde

Coron, 2024-04-03T00:00:00-04:00 Cet ouvrage aborde de front la question de la production et l'usage de données statistiques chiffrés dans les pratiques de gestion des ressources humaines GRH et celle de leur production et usage dans la recherche en GRH en appliquant ces sujets au cas de l'galité professionnelle entre les femmes et les hommes La pauvreté au Sahel

Vincent Bonnecase, 2011 Si aujourd'hui l'Afrique saharienne passe pour être une des régions les plus pauvres du monde tel n'a pas toujours été le cas Jusque dans les années 1930 il n'est pas question de valuer les conditions de vie de populations africaines l'aune de normes universelles Il y a alors entre les sociétés colonisées et celles qui ne le sont pas une barrière d'incommensurabilité qui se pose dans des termes raciaux Blancs et Noirs ne sauraient avoir les mêmes besoins biologiques ni

les mes aspirations sociales C est le délitement progressif de cette barrière dont ce livre s'attache à retracer l'histoire au Burkina Faso au Mali et au Niger de la fin de la période coloniale à la grande famine des années 1970. Quand des administrateurs des mandats ou des chercheurs se sont mis à partir dans des villes et des villages sahariens pour y valuer la ration calorique, la mortalité infantile ou les budgets familiaux, sur quels critères successifs parfois contradictoires se sont-ils fondés pour mesurer le niveau de vie des populations ? Comment ces dernières ont-elles appris à rendre les investigations dont elles faisaient l'objet, quelles demandes politiques ces nouveaux savoirs ont-ils rendues et quels en sont les différents usages avant et après les indépendances ? Ces questions ne se cantonnent pas au passé colonial. Elles engagent finalement la manière dont la mesure de la pauvreté est devenue un outil de gouvernement en Afrique contemporaine.

Revue Anthropologie des connaissances, Vol. 6 Collectif, 2014-06-02 La Revue d'anthropologie des Connaissances se propose d'explorer un champ de réflexion formé de nombreux travaux : la fois théoriques et pratiques qui visent à montrer comment la connaissance se forme et se diffuse. La revue publie des articles en provenance des sciences sociales qui s'attachent à étudier des connaissances réalisées comme discours, comme pratiques ou comme dispositifs techniques sur les conditions de leur production, de leur utilisation, de leur transmission et plus largement de leur mobilisation par les collectifs d'humains. Le terme anthropologie est pris ici non pas dans son sens particulier mais au sens général d'enquête multidisciplinaire sur les pratiques et les conduites, sur les représentations et les idéologies sur les professions, les organisations et les institutions, sur les techniques et les productions dans leurs singularités historiques.

The Anthem Companion to Maurice Halbwachs Robert Leroux, Jean-Christophe Marcel, 2021-07-06 This book seeks to place Halbwachs in his historical and intellectual context, showing that his work was sensitive to the events of his time and that the development of his analysis could be influenced by happenstance. The book does this not by summarizing or synthesizing his thinking by the growing literature embodied by many sociologists and historians of social sciences published for the most part in scientific journals that focus on the sociological thought that Halbwachs developed in his writings. Then come many studies that emerge from the history of ideas and epistemology; these are entirely devoted to a particular facet of Halbwachs' work either to place it in its scientific context or to discuss it on the basis of fundamental cognitive issues.

Official Statistics 4.0 Walter J. Radermacher, 2019-12-28 This book explores official statistics and their social function in modern societies. Digitisation and globalisation are creating completely new opportunities and risks, a context in which facts can play an enormously important part if they are produced with a quality that makes them credible and purpose specific. In order for this to actually happen, official statistics must continue to actively pursue the modernisation of their working methods. This book is not about the technical and methodological challenges associated with digitisation and globalisation; rather, it focuses on statistical sociology, which scientifically deals with the peculiarities and pitfalls of governing by numbers and assigns statistics a suitable position in the future informational ecosystem. Further, the book provides a comprehensive overview of modern issues in official statistics embodied in a historical

and conceptual framework that endows it with different and innovative perspectives Central to this work is the quality of statistical information provided by official statistics The implementation of the UN Sustainable Development Goals in the form of indicators is another driving force in the search for answers and is addressed here This book will be of interest to a broad readership The topics of sociology epistemology statistical history and the management of production processes which are important for official statistics and their role in social decision making processes are generally not dealt with in statistics books The book is primary intended for official statisticians but researchers and advanced students in statistics economics sociology and the political sciences will find the book equally stimulating Last but not least it offers a valuable source of reflection for policymakers and stakeholders

A Research Agenda for HR Analytics Vicenc Fernandez,2024-12-09 This Research Agenda explores the crucial role of HR analytics in modern organizations examining diverse methodologies data sources and ethical considerations It demonstrates how HR analytics can be used to navigate the complex challenges of digital transformation and implementing data driven practices in human resource management

Quantifying Human Resources Clotilde Coron,2020-06-16 Since the late 20th Century Human Resources HR has had a legal obligation to produce reports for management in most firms However these have long been considered restrictive and are seldom used to improve decision making More recently the emergence of analytics Big Data and algorithms has enabled a reconfiguration of the uses of quantification in HR Accompanied by empirical examples this book presents and defines the different tools and uses of quantification in HR It studies the effect of these tools on decision making and without subscribing to the myth of objective and rational quantification presents the contributions and limits of the use of data in HR and analyzes the potential risks of excessive quantification It also discusses the appropriation of these tools by the various players in a company and examines their effects on the position of HR

Resources and Applied Methods in International Relations Guillaume Devin,2017-10-18 This book constitutes an up to date methodology reference work for International Relations IR scholars and students The study of IR calls for the use of multiple and various tools to try and describe international phenomena analyze and understand them compare them interpret them and try to offer theoretical approaches In a nutshell doing research in IR requires both tools and methods from the use of archives to the translation of results through mapping from conducting interviews to analyzing quantitative data from constituting a corpus to the always touchy interpretation of images and discourses This volume assembles twenty young researchers and professors in the field of IR and political science to discuss numerous rich and thoroughly explained case studies Merging traditional political science approaches with methods borrowed from sociology and history it offers a clear and instructive synthesis of the main resources and applied methods to study International Relations

Observing Agriculture in Early Twentieth-Century Italy Federico D'Onofrio, 2016-05-20 Agricultural Economists in Early Twentieth Century Italy describes how Italian agricultural economists collected information about the economy of Italy between the Giolittian and the Fascist era. The book carefully describes three main forms of economic observation: enquiries, statistics and farm surveys. For each of these forms of observation the main participants to the investigation are discussed with their respective agendas alongside the purposes of the investigation and its practical constraints. This work introduces the concept of stakeholder statistics and stresses the two way relation between the observer and the observed in the co-production of observational knowledge. Practices of observation developed together with agricultural economics as a discipline and a profession. The study of forms of investigation therefore shed light on the constitution of a coherent and self-conscious group of agricultural economists in Italy and the scientific and methodological alliances they forged with agricultural economists elsewhere in Europe. Thanks to ambitious research projects Ghino Valenti in the Giolittian period and Arrigo Serpieri after the First World War led the transformation of Italian agricultural economists from agents of estate owners to social and economic experts in the service of the Italian state. The group of agricultural economists who gathered around Serpieri played an important role in supplying the ideology of the agricultural elites with economic content especially after the First World War along lines that resemble the development of agrarian ideologies in other countries of Central Europe. This work discusses how observation entered the political debate on agricultural policies of the Fascist regime, namely the so called Ruralismo.

The Evaluation of Research in Social Sciences and Humanities Andrea Bonaccorsi, 2018-01-04 This book examines very important issues in research evaluation in the Social Sciences and Humanities. It is based on recent experiences carried out in Italy 2011-2015 in the fields of research assessment, peer review, journal classification and construction of indicators and presents a systematic review of theoretical issues influencing the evaluation of Social Sciences and Humanities. Several chapters analyse original data made available through research assessment exercises. Other chapters are the result of dedicated and independent research carried out in 2014-2015 aimed at addressing some of the debated and open issues for example in the evaluation of books, the use of Library Catalog Analysis or Google Scholar, the definition of research quality criteria, on internationalization as well as opening the way to innovative indicators. The book is therefore a timely and important contribution to the international debate.
