

Poverty

Introduction:

Poverty is defined as the condition when a person or household lacks the resources necessary to be able to consume a certain minimum basket of goods. This basket of goods consists of either food alone or food, clothing and housing combined. The World Bank defines poverty in absolute terms. The bank defines extreme poverty as living on less than US\$1.90 per day. (PPP), and moderate poverty as less than \$3.10 a day.

From the surface, poverty in definition is the inability of a person or household to buy a basket of essential goods. Yet in reality it encompasses very divergent and macro economically more detailed constituents. For example, higher cost of medical care is directly linked to the ability or inability of the poor households to buy essential goods. Hence, even though healthcare is not considered either as a service or a good in the basket of inflation, it clearly impacts the income level of household especially the lower strata of income earners. Hence, the absolute definition of poverty is not accurate. In real, poverty may be defined as the inability of people or household to buy essential goods or services which are a prerequisite for their survival.

Causes of Poverty in Pakistan

Poor Governance

Governance is defined as the manner in which power is exercised in the management of a country's social and economic resources for development. Good governance implies a capacity to turn public income into human development outcomes. Good governance is an essential pre-condition for pro-poor growth as it establishes the enabling regulatory and legal framework essential for the sound functioning of land, labor, capital and other factor markets.

Political Instability

In general, political instability and macroeconomic imbalances have been reflected in poor creditworthiness ratings of the country, even compared to other countries of similar income levels, with resulting capital flight and lower foreign direct investment inflows. Low FDI's also contributes to loss of possible job for low earning labor market. This results in aggravation of poverty statistics of Pakistan.

Non Transparency in Resource Allocation

Non-transparency in the management of public accounts has led to a distortion of development priorities and a tendency to safeguard the interests of specific groups at the expense of the larger public interest. Examples include the government's hesitance to impose agricultural income tax; the tendency to frequently grant concessions or exemptions on taxes and tariffs, which often benefit powerful pressure groups; and ad hoc decision making on imports and exports as well as pricing in the agricultural sector, which can favor hoarding and speculation.

Weak Public Sector Capacity

Over-centralization in the public sector has led to inefficient delivery of social sector related and other services with the resulting disenchantment of the citizenry in the ability of the State to provide effective and accessible services. At the same time, the role of the private and civil society sector has not been systematically encouraged to build synergistic public private partnerships to achieve greater scale and coverage in the delivery of these services.

Economic Determinants of Poverty in Pakistan

Lack of Employment Resources

As per Pakistan Bureau of Statistics figures, the average annual GDP of Pakistan for past 5 years stand at 3.5% which is not sufficient enough to accommodate the average 3% increase in labor force every year. As a result, millions of young workforce joins the ranks of unemployment at an early age. Lack of sufficient resources for employment increases the burden of families to support its members with the same level of income. Hence, majority of the poor population whose hopes are pinned at the
