In 1980, the Supreme Court held that a town ordinance that regulated door-to-door or on-street solicitation of contributions was unconstitutionally overbroad. Village of Schaumburg v. Citizens for A Better Environment, 444 U.S. 620 (1980). The ordinance allowed solicitations only if the soliciting organization could show, in applying for a permit, that 75% of its receipts would be used directly for charitable purposes. Salaries or commissions for solicitors and administrative costs and overhead could not be considered as used directly for charitable purposes under the ordinance.

The Court, in an 8-1 decision, concluded that, although soliciting financial support is subject to reasonable regulation, the Schaumburg ordinance was drafted more broadly than reasonably necessary to regulate solicitation. As a result, the ordinance interfered with First and Fourteenth Amendment guarantees of the right of free speech and assembly.

Although it may not be apparent at first how solicitation of funds can be equated with the exercise of free speech, the Court was concerned that the ordinance in Schaumburg would prevent fundraising organizations that necessarily had high administrative costs from disseminating information from door-to-door or on the street. The organization in Schaumburg used a substantial part of its receipts for the salaries of its door-to-door solicitors, who distributed information on environmental issues as they asked for contributions. Without a salaried staff of solicitors, the organization would have been less able to obtain the help needed to make its information available to the public. The strict 75% requirement discouraged fundraising and public contacts by organizations that relied primarily

**The Fallacy of Campaign Finance Reform** John Samples,2008-09-15 At first glance campaign finance reform looks like a good idea McCain Feingold for instance regulates campaigns by prohibiting national political parties from accepting soft money contributions from corporations labor unions and wealthy individuals But are such measures or any of the numerous and similarly restrictive proposals that have circulated through Washington in recent years really good for our democracy John Samples says no and here he takes a penetrating look into the premises and consequences of the long crusade against big money in politics How many Americans he asks know that there is little to no evidence that campaign contributions really influence members of Congress Or that so called negative political advertising actually improves the democratic process by increasing voter turnout and knowledge Or that limits on campaign contributions make it harder to run for office thereby protecting incumbent representatives from losing their seats of power Posing tough questions such as these Samples uncovers numerous fallacies beneath proposals for campaign finance reform He argues that our most common concerns about money in politics are misplaced because the ideals implicit in our notion of corruption are incoherent or indefensible The chance to regulate money in politics allows representatives to serve their own interests at a cost to their constituents And ironically this long crusade against the corruption caused by campaign contributions allows public officials to reduce their vulnerability by suppressing electoral competition Defying long held assumptions and conventional political wisdom The Fallacy of Campaign Finance Reform is a provocative and decidedly nonpartisan work that will be essential for anyone concerned about the future of American government

Johnson, David D. Perlmutter, 2013-12-16 Some political observers dubbed the 2008 presidential campaign as the Facebook Election Barack Obama in particular employed social media such as blogs Twitter Flickr Digg YouTube MySpace and Facebook to run a grassroots style campaign The Obama campaign was keenly aware that voters particularly the young are not simply consumers of information but conduits of

information as well. They often replaced the professional filter of traditional media with a social one. Social media allowed candidates to do electronically what previously had to be done through shoe leather and phone banks: contact volunteers and donors and schedule and promote events. The 2008 Election marked a new era where the candidates no longer had complete control over their campaign message. The individual viewer in a campaign crowd with a cell phone can record a candidate's gaffe, post it on YouTube or Flickr, and within days millions will be gasping or guffawing. The traditional campaign with its centralized power and planning, although not dead now, coexists with an unstructured digital democracy. New Media Campaigning and the 2008 Facebook Election examines the way social media changed how candidates campaigned, how the media covered the election, and how voters received information. This book is based on a special issue of Mass Communication Society.

**Modern Mathematical Statistics with Applications** Jay L. Devore, Kenneth N. Berk, 2011-12-07. Modern Mathematical Statistics with Applications, Second Edition, strikes a balance between mathematical foundations and statistical practice. In keeping with the recommendation that every math student should study statistics and probability with an emphasis on data analysis, accomplished authors Jay Devore and Kenneth Berk make statistical concepts and methods clear and relevant through careful explanations and a broad range of applications involving real data. The main focus of the book is on presenting and illustrating methods of inferential statistics that are useful in research. It begins with a chapter on descriptive statistics that immediately exposes the reader to real data. The next six chapters develop the probability material that bridges the gap between descriptive and inferential statistics. Point estimation, inferences based on statistical intervals, and hypothesis testing are then introduced in the next three chapters. The remainder of the book explores the use of this methodology in a variety of more complex settings. This edition includes a plethora of new exercises, a number of which are similar to what would be encountered on the actuarial exams that cover probability and statistics. Representative applications include investigating whether the average tip percentage in a particular restaurant exceeds the standard 15%, considering whether the flavor and aroma of Champagne are affected by bottle temperature or type of pour, modeling the relationship between college graduation rate and average SAT score, and assessing the likelihood of O-ring failure in space shuttle launches as related to launch temperature.
