

10 TIPS for the NLE Board Examination:

1. Accept the fact that you can never know everything. Therefore, once you see an unfamiliar question that was never been taught, use your test taking strategies.
2. If you are in TEST I, II, III and IV and you are being asked to prioritize, Use ABC first and then the Maslow's Hierarchy of needs.
3. The use of your nursing process is heralded by the word - "The Nurse Would or The nurse's initial action" Remember to Assess first before intervening. If the situation and the question already assessed the patient, then proceed with the next step.
4. Encircle your modifiers. Some people make mistakes because of failure to see the word, "EXCEPT" or "NOT" or "INAPPROPRIATE"
5. Use your questioners as you scratch. You can write anything on that paper. If you will skip a number, place an asterisk or encircle the number.
6. **DO NOT USE BLUNT PENCIL.** Always use a sharp one and shade lightly. A sharpened pencil will give a very dark shade even if you will shade it lightly. Use the sides of the pencil not the tip. Use MONGOL NUMBER 2 ONLY. Some brands especially those made in china pencils are substandard. The machine will check the lead. If you are INCONSISTENT with your shading like an altering dark and light shade, you will FAIL the boards because of technicalities.
7. In your NP I, Remember to master these topics: The levels of prevention, 3 way bottle system, Chest Physiotherapy and Postural drainage, Nursing process, Managerial process, Managerial leadership style, Patterns of Nursing Care, Knowing your Independent and Dependent variable, The exact arrangement of the research process as well as research design (qualitative and quantitative), RA 9173, The PRC and BON Power and responsibilities as stipulated in RA 9173, The nurse's code of ethics, Nursing ethical principles like your beneficence, non maleficence, prudence, justice, etc. Delegation and prioritization (Staff nurse will report to headnurse and then supervisor) Therapeutic communication, always answer - " You seem afraid or upset" The complications of Immobility like your atelectasis, pneumonia and deep vein thrombosis and also your crimes related to nursing and the circumstances of the crimes, Blood transfusion (Blood is never routinely warmed) and IV Fluids and your IV Therapy, which are isotonic, hypo, and hypertonic, the complications associated with IV therapy like Phlebitis and Infiltration.
