

MOVIE CRITIQUE

The movie *To Sir with Love*, directed by James Clavel in 1967, deals with vital social issues of the time.

Social class, ethnicity, and gender have always been considered as possible barriers to equality of opportunity in education. This issue is always present in the movie. The main character, Mark, encounters numerous difficulties with employment because of his skin color. Although it seems that being a Negro did not prevent him from getting all-round education and an academic degree, he is not accepted to work anywhere besides low-rate school for difficult children.

There is little evidence of educational inequality conditioned by gender. In Mark's class there are both boys and girls, and the latter seem to be treated as equals. The school provides similar educational environment for both sexes. However, low social status and neglectful attitude of the parents diminishes the children's chances to get good education. East End is considered as inferior to other districts, and the children from local schools have less opportunities than those from more prestigious educational institutions.

The relationship between teachers and students has considerable influence on the students' performance. Teacher's expectations have strong impact on the student's performance. The maturity with which Mark begins to treat the students encourages them to make progress and excites their interest. Trust and tolerance displayed by the teacher and his respect of the student's personalities serve as effective stimuli and improve their academic performance. Individualism and liberty that are often viewed as the main

Practical Approaches to Teaching Film Rachel S. Ritterbusch, 2020-07-24 Rachel Ritterbusch's *Practical Approaches to Teaching Film* is a collection of essays focusing on the use of film in settings ranging from an introductory film class to an upper division Women's Studies course. Drawing on their experience in the classroom, contributors to this anthology show how movies can be used to promote critical thinking, create an awareness of the male gaze, challenge dominant ideology, and unmask the constructedness of film. This volume treats a wide variety of film texts from box office hits like *The Da Vinci Code* to underappreciated art films such as Susan Streitfeld's *Female Perversions* from *Pleasant Moko* and other French classics to more contemporary francophone works like *Chaos* and *Rosetta* from self-reflexive films that interrogate the act of filmmaking itself to those that draw attention to the phallogocentric nature of cinematic apparatus. Common to all these essays is the belief that if used judiciously, film can be a valuable pedagogical tool. Aimed both at those currently teaching film and those wishing to do so, this volume provides practical support in the form of sample syllabi, assignments, and a glossary of film terms.

Cognitive Informatics and Soft Computing Pradeep Kumar Mallick, Akash Kumar Bhoi, Gonçalo Marques, Victor Hugo C. de Albuquerque, 2021-07-01 This book presents best selected research papers presented at the 3rd International Conference on Cognitive Informatics and Soft Computing (CISC 2020) held at Balasore College of Engineering Technology, Balasore, Odisha, India, from 12 to 13 December 2020. It highlights in particular innovative research in the fields of cognitive informatics, cognitive computing, computational intelligence, advanced computing, and hybrid intelligent models and applications. New algorithms and methods in a variety of fields are presented together with solution-based approaches. The topics addressed include various theoretical aspects and applications of computer science, artificial intelligence, cybernetics, automation, control theory, and software engineering.

Advanced Network Technologies and Intelligent Computing Anshul Verma, Pradeepika Verma, Kiran Kumar Pattanaik, Rajkumar Buyya, Dipankar Dasgupta, 2025-03-07 This book constitutes the refereed proceedings of the 4th International Conference on Advanced Network Technologies and Intelligent Computing (ANTIC 2024) held in Varanasi, India, during December 19–21, 2024. The 95 full papers and 15 short papers included in this book were carefully reviewed and selected from 507 submissions. They were organized in topical sections as follows: Advanced Network Technologies and Intelligent Computing.

Soft Computing and Signal Processing Vustikayala Sivakumar Reddy, Jiachun Wang, K.T.V. Reddy, 2024-04-15 This book presents selected research papers on current developments in the fields of soft computing and signal processing from the Sixth International Conference on Soft Computing and Signal Processing (ICSCSP 2023). The book covers topics such as soft sets, rough sets, fuzzy logic, neural networks, genetic algorithms, and machine learning, and discusses various aspects of these topics, e.g., technological considerations, product implementation, and application issues.

Documentary Making for Digital Humanists Darren R. Reid, Brett Sanders, 2021-11-02. This fluent and comprehensive field guide responds to increased interest across the humanities in the ways in which digital technologies can disrupt and open up new research and pedagogical avenues. It is designed to help scholars and students engage with their subjects using an audio-visual grammar and to allow readers to efficiently gain the technical and theoretical skills necessary to create and disseminate their own trans-media projects. Documentary Making for Digital Humanists sets out the fundamentals of filmmaking, explores academic discourse on digital documentaries and online distribution, and considers the place of this discourse in the evolving academic landscape. The book walks its readers through the intellectual and practical processes of creating digital media and documentary projects. It is further equipped with video elements supplementing specific chapters and providing brief and accessible introductions to the key components of the filmmaking process. This will be a valuable resource to humanist scholars and students seeking to embrace new media production and the digital landscape, and to those researchers interested in using means beyond the written word to disseminate their work. It constitutes a welcome contribution to the burgeoning field of digital humanities as the first practical guide of its kind designed to facilitate humanist interactions with digital filmmaking and to empower scholars and students alike to create and distribute new media audio-visual artefacts.

Practical Machine Learning with Python Dipanjan Sarkar, Raghav Bali, Tushar Sharma, 2017-12-20. Master the essential skills needed to recognize and solve complex problems with machine learning and deep learning. Using real-world examples that leverage the popular Python machine learning ecosystem, this book is your perfect companion for learning the art and science of machine learning to become a successful practitioner. The concepts, techniques, tools, frameworks, and methodologies used in this book will teach you how to think, design, build, and execute machine learning systems and projects successfully. Practical Machine Learning with Python follows a structured and comprehensive three-tiered approach packed with hands-on examples and code. Part 1 focuses on understanding machine learning concepts and tools. This includes machine learning basics with a broad overview of algorithms, techniques, concepts, and applications, followed by a tour of the entire Python machine learning ecosystem. Brief guides for useful machine learning tools, libraries, and frameworks are also covered. Part 2 details standard machine learning pipelines with an emphasis on data processing, analysis, feature engineering, and modeling. You will learn how to process, wrangle, summarize, and visualize data in its various forms. Feature engineering and selection methodologies will be covered in detail with real-world datasets, followed by model building, tuning, interpretation, and deployment. Part 3 explores multiple real-world case studies spanning diverse domains and industries like

retail transportation movies music marketing computer vision and finance For each case study you will learn the application of various machine learning techniques and methods The hands on examples will help you become familiar with state of the art machine learning tools and techniques and understand what algorithms are best suited for any problem Practical Machine Learning with Python will empower you to start solving your own problems with machine learning today What You ll Learn Execute end to end machine learning projects and systems Implement hands on examples with industry standard open source robust machine learning tools and frameworks Review case studies depicting applications of machine learning and deep learning on diverse domains and industries Apply a wide range of machine learning models including regression classification and clustering Understand and apply the latest models and methodologies from deep learning including CNNs RNNs LSTMs and transfer learning Who This Book Is For IT professionals analysts developers data scientists engineers graduate students

Distributed Computing and Intelligent Technology Stéphane Devismes, Partha Sarathi Mandal, V. Vijaya Saradhi, Bhanu Prasad, Anisur Rahaman Molla, Gokarna Sharma, 2024-01-03 This book constitutes the refereed proceedings of the 20th International Conference on Distributed Computing and Intelligent Technology ICDCIT 2024 which was held in Bhubaneswar India during January 17 20 2024 The 24 full papers presented in this volume were carefully reviewed and selected from 116 submissions The papers are organized in the following topical sections Distributed Computing DC and Intelligent Technology IT The DC track solicits original research papers contributing to the foundations and applications of distributed computing whereas the IT track solicits original research papers contributing to the foundations and applications of Intelligent Technology

ECAI 2023 K. Gal, A. Nowé, G.J. Nalepa, 2023-10-18 Artificial intelligence or AI now affects the day to day life of almost everyone on the planet and continues to be a perennial hot topic in the news This book presents the proceedings of ECAI 2023 the 26th European Conference on Artificial Intelligence and of PAIS 2023 the 12th Conference on Prestigious Applications of Intelligent Systems held from 30 September to 4 October 2023 and on 3 October 2023 respectively in Krak w Poland Since 1974 ECAI has been the premier venue for presenting AI research in Europe and this annual conference has become the place for researchers and practitioners of AI to discuss the latest trends and challenges in all subfields of AI and to demonstrate innovative applications and uses of advanced AI technology ECAI 2023 received 1896 submissions a record number of which 1691 were retained for review ultimately resulting in an acceptance rate of 23% The 390 papers included here cover topics including machine learning natural language processing multi agent systems and vision and knowledge representation and reasoning PAIS 2023 received 17 submissions of which 10 were accepted after a rigorous review process Those 10 papers cover topics ranging from fostering better working environments behavior modeling and citizen science to large language models and neuro symbolic applications and are also included here Presenting a comprehensive overview of current research and developments in AI the book will be of interest to all those working in the field

Strategies for Writing from Sources Jessica Hathaway, 2016-01-01

Students in today's classrooms must be able to draw evidence, reasons, and ideas from various sources. This invaluable classroom resource offers practical, easy-to-use strategies to help students analyze any text and use it as a source in their own writing. Tracing the Impact of First Year Writing presents the results of a large scale longitudinal study of college writers that explores the impact of a required first year writing course with a comparative approach not previously available Over five years Laura Wilder conducted 143 interviews with and collected 774 pages of writing from 58 students half of whom had taken a new first year writing course and half who had not Wilder found that while in many ways the experiences of both groups are comparable demonstrating how students receive valuable educations in rhetoric and writing from a variety of sources beyond a first year writing course students who took the first year writing course were much more likely to identify as writers This identification supported students use of writing in powerfully generative and knowledge building ways that they carried with them long after the course into other appropriate contexts In contrast to previous longitudinal studies of college writers undertaken at institutions with high prestige and resources Tracing the Impact of First Year Writing explores the role of writing at a regional public university and documents how students experiences with writing can be highly divergent across the curriculum and unequal across campuses Additionally this book includes the voices of students who do not identify as capable writers and have strongly negative emotional reactions to writing and writing instruction and adds empirical support to innovative calls in the field to transform the first year writing course into one that inspires students to reflectively consider writing itself
