

Goal	Currently Jane is...	Strategy for moving forward	Goal is achieved when...
Organization and Planning			
1. Keep accordion folder, writing binder, and computer desktop organized.	...organized, but in years past papers have become lost as the year has progressed. Additionally, her desktop has been filled with many files, not specifically named. Jane still needs support reviewing what was filed to make sure it has been filed correctly.	Time will be spent each session filing new handouts correctly in devices (folders, accordion folder, and/or binder). Sections/folders will be segregated by color for ease of identification and coordinated with colored note cards and paper when possible. Monthly reviews of sections will be instituted to keep devices manageable. Names and colors of computer files will also be generated concurrently so on-line work is coordinated and aligned.	...binder, folder, and desktop are neatly and accurately organized. Jane will be able to maintain these systems independently.
Writing			
2. Write a focused, five-paragraph essay.	...able to draft an essay, but has difficulty with organizing thoughts, as well as fitting thoughts into a structured format.	Jane will learn semantic webbing techniques, as well as use graphic organizers to help focus ideas. She will also build upon her ability to talk through her ideas by utilizing dictation software to record her thinking. Finally, support will be given to techniques taught by Ms. Smith in her school's writing class.	... Jane will be able to independently draft a focused, five paragraph essay. Each paragraph will contain a topic and concluding sentence, as well as supporting details. In addition, she will be able to focus her papers around a thesis.
Sustaining and Focusing Attention			
3. To structure work sessions so that optimal learning is happening during the time available.	...falling off task or becoming easily distracted when working on a low-interest activity. This leads to inaccurate or incomplete work, or work that takes much longer than necessary to complete.	Jane will learn how to divide work time into manageable chunks. For example, an hour's work block might be broken up into three, 15 minute sessions with five minute breaks in between. Each session will cover steps needed to be successful with what work is assigned. She will also learn targeted mindfulness techniques to become more aware of when she is falling off task, and tools to bring her attention back when distracted. Finally, Jane will learn techniques to make low interest work engaging, including game design and inquiry-driven, associative exploration.	... Jane will be able to design work time so that she is productively completing assignments. She will be able to identify when she is falling off task and utilize strategies that can help her better attend to her work.

The Impact of AI-Driven Personalized Learning on Mathematics Achievement and Student Engagement in Rural vs. Urban Schools in Karnataka, India KHRITISH SWARGIARY, 2024-06-03 This empirical study examines the impact of AI driven personalized learning platforms on mathematics achievement and student engagement among middle school students in rural and urban schools in Karnataka India Utilizing a quasi experimental design the study involved 400 students 200 rural 200 urban split into control and experimental groups Pre test and post test assessments were conducted using standardized mathematics tests engagement surveys classroom observations and AI platform analytics Results showed significant improvements in post test scores for the experimental groups using AI platforms compared to control groups in both settings $p < 0.001$ Specifically rural experimental group scores improved from a pre test mean of 62.5 to a post test mean of 78.3 while urban experimental group scores increased from 68.2 to 83.9 Engagement levels were also higher in experimental groups with rural students scoring 78.5 on engagement surveys compared to 65.2 in the control

group and urban students scoring 82.1 compared to 69.8. However, rural schools reported greater challenges in implementation, including inadequate internet connectivity (78% vs 32%, $p < 0.001$) and lack of devices (65% vs 28%, $p < 0.001$). These findings suggest that while AI-driven platforms significantly enhance educational outcomes, tailored strategies are necessary to address the distinct challenges faced by rural schools. Recommendations include improving rural infrastructure, expanding teacher training, and fostering supportive environments to maximize the benefits of AI-driven personalized learning.

Finnish Lessons 2.0 Pasi Sahlberg, 2014-02-01. Pasi Sahlberg has thoroughly updated his groundbreaking account of how Finland built a world-class education system during the past four decades. In this international bestseller, Sahlberg traces the evolution of Finnish education policies and highlights how they differ from the United States and much of the rest of the world. Featuring substantial additions throughout the text, *Finnish Lessons 2.0* demonstrates how systematically focusing on teacher and leader professionalism, building trust between the society and its schools, and investing in educational equity rather than competition, choice, and other market-based reforms make Finnish schools an international model of success. This second edition details the complexity of meaningful change by examining Finland's educational performance in light of the most recent international assessment data and domestic changes.

Instructional-Design Theories and Models, Volume IV Charles M. Reigeluth, Brian J. Beatty, Rodney D. Myers, 2016-07-22. *Instructional Design Theories and Models Volume IV* provides a research-based description of the current state of instructional theory for the learner-centered paradigm of education, as well as a clear indication of how different theories and models interrelate. Significant changes have occurred in learning and instructional theory since the publication of Volume III, including advances in brain-based learning, learning sciences, information technologies, internet-based communication, a concern for customizing the student experience to maximize effectiveness, and scaling instructional environments to maximize efficiency. In order to complement the themes of Volume I (commonality and complementarity among theories of instruction), Volume II (diversity of theories), and Volume III (building a common knowledge base), the theme of Volume IV is shifting the paradigm of instruction from teacher-centered to learner-centered and integrating design theories of instruction, assessment, and curriculum. Chapters in Volume IV are collected into three primary sections: a comprehensive view of the learner-centered paradigm of education and training; elaborations on parts of that view for a variety of K-12 and higher education settings; and theories that address ways to move toward the learner-centered paradigm within the teacher-centered paradigm. *Instructional Design Theories and Models Volume IV* is an essential book for anyone interested in exploring more powerful ways of fostering human learning and development and thinking creatively about ways to best meet the needs of learners in all kinds of learning contexts.
