categories with each category representing a major skill set required by most security professionals 1 Coding The ability to
program and script is quickly becoming a mainstream requirement for just about everyone in the security industry This
section covers the basics in coding complemented with a slue of programming tips and tricks in C C Java Perl and NASL 2
Sockets The technology that allows programs and scripts to communicate over a network is sockets Even though the theory
remains the same communication over TCP and UDP sockets are implemented differently in nearly ever language 3 Shellcode
Shellcode commonly defined as bytecode converted from Assembly is utilized to execute commands on remote systems via
direct memory access 4 Porting Due to the differences between operating platforms and language implementations on those
platforms it is a common practice to modify an original body of code to work on a different platforms This technique is known
as porting and is incredible useful in the real world environments since it allows you to not recreate the wheel 5 Coding Tools
The culmination of the previous four sections coding tools brings all of the techniques that you have learned to the forefront
With the background technologies and techniques you will now be able to code quick utilities that will not only make you
more productive they will arm you with an extremely valuable skill that will remain with you as long as you make the proper
