Quality Management Sui Pheng Low,Joy Ong,2014-04-29 The book presents the development of the Construction Quality
Assessment System CONQUAS Singapore s de facto quality performance measurement system explains the application of the
Quality Management System QMS to manage CONQUAS and identifies 33 critical success factors CSFs for achieving high
CONQUAS scores Through CONQUAS the reader benefits from understanding how the Singapore government developed and
implemented the first objective system for measuring what many building professionals have perceived to be elusive quality
standards in the construction industry The book presents both the theoretical concepts as well as the practical aspects to
achieving strategic Project Quality Management that is anchored on the CSFs to building best practices To realistically
reflect the practical aspects and challenging issues faced by stakeholders in the construction industry questionnaire surveys
were conducted with building professionals to distinguish the importance level and extent of adoption of the 33 CSFs
identified from a comprehensive review of the extant literature in influencing and affecting the achievement of high
CONQUAS scores These were further anchored by in depth interviews with quality experts in the Singapore construction
industry to provide a better understanding of issues relating to strategic Project Quality Management Collectively the
empirical findings collated from the building professionals suggest that while the CSFs identified are known tenets of quality
these were still not being followed in their totality A further case study was conducted through a formal set of in depth
interviews with the quality assurance team of a construction company who has direct involvement before during and after
their tremendous improvements in the CONQUAS scores attained The strength of this book therefore represents a true
account and reflections of real life practices and experiences in the construction industry for contractors quality managers
and policy makers to learn from Although the context of this book relates to the Singapore experience the lessons and
recommendations are equally relevant and applicable to the global construction industry in both the developing and
developed countries whose stakeholders in both the public and private sectors wish to understand how CONQUAS works and
how the CSFs identified can likewise be implemented for strategic Project Quality Management to building best practices
The book is therefore of interests to researchers academia and practitioners in the construction industry as well as in other
sectors of the economy in Singapore and other countries where learning points may be used for enhancing project quality

Region: Learning from Experiences and Promoting Sustainable Performance Roula Khadra,Juan Antonio
Sagardoy,2019-03-27 This book aims at deriving governance and sustainability lessons from analysing the implementation
and management of some major irrigation programs in the Mediterranean Region Eight countries are targeted namely Spain
Italy Albania Turkey Jordan Egypt Tunisia and Morocco The main focus programs include the modernisation and
rehabilitation of the existing irrigation systems the transfer of irrigation management responsibilities to water users
organizations public private partnerships arrangements the monitoring evaluation of participatory irrigation management
and transfer processes and the governance of groundwater resources for irrigation The adopted approach relies on learning
from the value of each single experience and on advancing solutions that emerge from their comparative analysis and that
may be of guidance to those engaged in these programs The country experiences indicated that often times significant
shortcomings in the implementation of these programs have occurred and hopefully this book could be a source of inspiration
