believe that wide ranging stakeholder input will generate innovative methods for assessing and improving quality that keep pace with our rapidly changing information society Two further foci are set on ECEC practices 1 that support participation diversity and inclusion of all children and families and 2 that are suitable for developing countries and diverse populations within countries In this the focus is not only on best practices but also on the limitations of practices In soliciting research articles on ECEC stakeholder perspectives we describe stakeholders as inclusive of government non government regulatory agencies service providers teachers and caregivers families communities and children Themes of interest include but are not limited to Assessment of quality in ECEC including self assessment approaches The design of and use of quality frameworks in ECEC Effects of quality and of quality improvement on children and families Drivers and indicators of quality improvement Acceptance and sustainability of quality efforts among ECEC stakeholders Policy expectations of quality rating and improvement systems e g funding policy The role of teacher and caregiver professionalization All types of center based and home based ECEC We are interested both in quantitative and qualitative research designs as well as in mixed methods research Cross sectional longitudinal quasi experimental and case study designs are welcome The following article types are welcome original research empirical studies systematic reviews community case studies policy briefs articles and brief research reports
