Goulet, 2013-04-05 Andrea Goulet takes the study of the novel into the realm of the visual by situating it in the context of
nineteenth century scientific and philosophical discourse about the nature of sight She argues that French realism detective
fiction science fiction and literature of the fantastic from 1830 to 1910 reflected competition between two modern visual
modes a not yet outdated idealism and an empiricism that located truth in the body More specifically the book argues that
key narrative forms of the nineteenth century were shaped by a set of scientific debates between idealism and materialism in
Honor Balzac's *Com die humaine* between deduction and induction in early French detective fiction and between objective
vision and subjective vision in the optogram fictions of Jules Verne and others Goulet aims to revise critical views on the
modern novel in a number of ways For instance although many literary studies focus on the impact of cinema photography
and painting *Optiques* asserts the materialist bases of realism by establishing a genealogy of popular fictional genres as
fundamentally optical that is as articulated according to bodily notions of sight With its chronological and interdisciplinary
scope *Optiques* stands to contribute an important chapter to the study of literary modernity in its scientific context **The**
