**Poultry Production in the Tropics** Angel L. Lambio,2012-12-31 This book details the raising of chickens and other poultry species duck turkey quail pigeon goose and ostrich for meat and eggs *Small Scale Poultry Farming* Razzab Shaikh,2014-12-27 Small scale poultry production is an obvious and well documented opportunity for poor farmers to start an income generating activity Poultry are cheap easy to rear and easy to manage Consequently there has been and there is a growing attention and interest in poultry production in villages as well as in peri urban and urban areas throughout the developing world However existing manuals and books either give advice on industrial production systems using improved imported breeds under highly controlled conditions or very simple field guides giving little useful advice on how to rear poultry with profit in mind at village level This manual is based on existing knowledge on how to improve village poultry production systems with relatively few inputs This manual will exclusively deal with free range systems consisting of small flocks of indigenous chickens or their crosses and smallholder flocks of improved or hybrid commercial chickens Poultry production can be divided into four sectors 1 industrial and integrated 2 commercial high biosecurity 3 commercial low biosecurity 4 village and family or backyard poultry The focus here is largely on sectors 3 and 4 but there may be some overlap Family poultry as defined by the International Network for Family PoultryDevelopment covers sectors 3 and 4 which encompass small scale poultry production There are numerous poultry handbooks which cover sectors 2 and 3 but this hand book has attempted in two manuals to cover mainly sector 3 while not ignoring the great importance of biosecurity particularly in the face of highly pathogenic avian influenza H5N1 It is envisaged that given time some producers now in

sector 3 may move into sector 2 The two manuals are pitched at two different levels The Trainer's instructor manual assumes that the trainer has qualifications and or experience in a branch of agricultural science but not necessarily in poultry production Some of the material included is beyond that necessary to give an initial course in poultry production but may be useful as the farmer progresses from sector 3 to sector 2 The trainee's manual has numerous illustrations and is aimed at a lower level than for the trainer The farmer may be interested in starting a poultry enterprise or is already producing poultry in a small scale commercial or semi commercial opportunistic situation but would like to make poultry farming more permanent The course will allow the farmer to increase his/her knowledge and skills and to become aware of a number of important issues e.g. managing the environment disease surveillance of his/her enterprise In order to minimise repetition there is some material in the trainee's manual that is not in the trainer's manual Trainers should familiarise themselves thoroughly with both manuals The third manual is for the millions of families worldwide in low income developing countries who keep backyard poultry mainly unmanaged with few inputs but nevertheless are of great importance by providing some security income and high quality protein It is hoped that this manual will make families aware of the possibility of improving output with a minimum of input Much of the information has been taken from a range of sources as well as the author's own experience of working in several developing countries over 25 years Ideally there should be a small scale demonstration unit or a poultry farm available so that the trainees can see first hand and better understand the main points in these manuals and observe how commercial poultry production should be practiced The importance of community poultry farming is seen as a critical step in alleviating poverty of household poultry keepers empowering women increasing income and moving from a scavenging system to one that is likely to be sustainable

**Small-scale Poultry Production** Emmanuel Babafunso Sonaiya, S. E. J. Swan, 2004-01-01 This technical guide promotes sustainable small scale family based poultry production It gives a comprehensive review of all aspects of small scale poultry production in developing countries and includes sections on feeding and nutrition housing general husbandry and flocks health Regional differences in health practices are also described The guide provides the technical and scientific building blocks needed to develop sustainable programs for small scale poultry production It will be of practical value to those keeping or planning to keep poultry and as a valuable technical reference for poultry specialists researchers students and those interested in broader rural development issues Publisher's description
