Pour Planifier Les Villes Autrement, 2013 **Urbanism and Town**

Planning Jean-Philippe Antoni, 2024-01-04 Sustainable urban planning and urban renewal are major challenges of the 21st century In this context Urbanism and Town Planning proposes a geohistorical approach to urban construction The city and its neighborhoods are studied through their materials and general layout which sometimes reveal a logic of economic profitability prestige and social equity and sometimes a more innovative approach from an environmental perspective Across these elements unbuilt spaces distinctive streets and squares and built spaces commercial and residential areas both individual and collective form a three dimensional grid of voids and solids characteristic of urban landscapes and lifestyles Supported by numerous original examples this book is a comprehensive summary of the most tangible elements of urban planning and development elements that must be put into context in order to think concretely about the development of the cities of the future

Transport and Town Planning Jean Laterrasse, 2019-05-21 In a context where climate change urgently requires us to alter our paradigms this book explores the possibilities of cities that are both more energy efficient and more respectful of the environment Based on the observation that urban planning has been detrimentally affected by the compartmentalization of knowledge and practices this book is conceived as a dialog between transport and urban planning on the one hand and between engineering and social science on the other Systemic analysis and a historical approach integrating the teachings of the last two centuries constitute at the methodological level the framework in which this dialog unfolds Based on examples of good practice Transport and Town Planning identifies an effective set of levers of action and proposes an original method to guide and accompany urban transition with a large share of the initiative reserved for the actors concerned

La clé des villes Marc Dumont, Cristina D'Alessandro-Scarpari, 2007 Il y a cinquante ans on rêvait d'y habiter aujourd'hui on la fuit La ville serait le théâtre de tous les maux tout en restant l'espace de tous les possibles On aime la ville pour ce qu'on y trouve on la hait pour ce qui s'y passe Et les idées reçues ne manquent pas Les villes sont polluées Il n'y a qu'en centre ville qu'il se passe quelque chose Vivre en ville c'est stressant La vie en ville coûte cher L'avenir des villes c'est d'être taille humaine Pourtant la ville n'a cessé d'évoluer de s'adapter en recherche permanente de solutions qui nous permettent de vivre ensemble Des idées des urbanistes auxquels on reproche souvent de construire des villes inhumaines aux bidonvilles du Tiers Monde qui ne cessent de s'étendre de la ville romaine aux villes nouvelles les auteurs nous invitent parcourir le paysage urbain en nous donnant les clés pour comprendre son évolution et les enjeux de demain Parcours sur le paysage urbain avec des clés pour en comprendre l'évolution et les enjeux

Prolifération des territoires et représentations de l'Union

européenne Sylvia Brunet, Lydia Lebon, Yann Richard, 2019-08-29 Si entre mondialisation et fragmentation l'état comme unité territoriale d'espace souverain est concurrencé par d'autres producteurs de normes le principe territorial persiste et tend même à se renouveler. Ce renouvellement se concrétise par la prolifération de primaires et de seconds plus ou moins institutionnalisés et formalisés toutes les échelles sub-nationales ou supra-nationales. Mais cette prolifération et cet enchevêtrement ne permettent pas toujours de légitimer leurs représentants ni de construire socialement des identités vécues. Beaucoup de territoires ne deviennent ni des objets de représentation ni des référents identitaires. Il existe dès lors une crise de légitimité politique qui touche aussi voire surtout l'identité européenne. *Vivre la Ville Vivre Bordeaux*, 2006

A cidade à escala humana Edson Leite Ribeiro, 2022-08-29 O livro mostra que apesar de a humanidade ter claramente definido a sua preferência crescente por habitar o urbano desde a transformação da aldeia para urbana a cidade tem tido dificuldade em demonstrar em seus espaços suas estruturas ambientais sua paisagem e seu funcionamento e a repartição espacial e temporal alguma coerência entre as soluções adotadas e as reais necessidades expectativas e anseios da comunidade local de forma inclusiva e em sua totalidade Seus espaços de forma crescente têm demonstrado valorizar mais alguns elementos seletivos e simbólicos nos sucessivos momentos históricos do que a própria comunidade que a habita Se torna essencial a busca de alternativas como a concertação social comunitária para a definição de soluções urbanas a valorização das pessoas e da comunidade com suas expressões espaciais a valorização do espaço público a aproximação entre os grupos sociais e a busca do reforço de soluções autônomas e endógenas da sociedade em contraponto s determinações heterônomas notadamente em função da globalização contemporânea Nesse aspecto observa-se certa convergência entre os paradigmas urbanos sustentáveis como o da cidade compacta e a humanização da cidade No entanto para a sua viabilização há a necessidade de um reaprendizado para a cultura da paz e do encontro em contrapartida atual pedagogia da competição e do conflito Um processo de aprendizado no qual o próprio espaço urbano pode ser bastante protagonista
