Joseph de Maistre's Life, Thought, and Influence

Richard Lebrun, 2001 In Joseph de Maistre's Life Thought and Influence leading Maistre scholars offer interpretations of his thought and make available in English recent French scholarship on his life and work They provide a portrait of Maistre as a significant thinker in numerous fields upsetting the image of him as a backward looking reactionary a reinterpretation furthered by contemporary interest in Counter Enlightenment thought in general *A Greater Freedom* Stephan

Kampowski, 2014-02-27 How does biotechnology touch on human destiny What are its promises and challenges In search for a response the present volume turns to the thought of Hans Jonas one of the pioneers and founding fathers of bioethics The continued relevance of his ideas is exemplified by the way Jurgen Habermas applies them to the current debate The chief promise of biotechnology is to increase our freedom by overcoming the limits of the human condition The main risk of biotechnology as both Jonas and Habermas see it is to diminish or outright abolish our capacity for responsibility and morality It is argued that the greater freedom is not simply freedom from constraints but freedom for our destiny the freedom to be the benevolent responsible and spontaneous authors of our lives capable of communion and love The touchstone for evaluating any biotechnological procedure has to be this greater freedom

Health Governance in Europe

Monika Steffen, 2005-11-28 Health constitutes a core element of welfare states and a vital nerve in the trust relation between citizen and their governments Focusing on the health sector this book analyzes the closely interwoven relationship between the European Union and Member States The authors explore the dynamic and multi fold process of de nationalizing health policies and illustrate how European policies develop in a sector that still appears to be under exclusively national competence They describe the multiple forms and ways the Europeanization process takes driven by market integration public health crises and politics of consumer protection The authors also provide a detailed analysis of key topics the pharmaceutical sector market regulation of medical goods and devices food safety the blood provision and plasma industry European politics on bioethics and risk reduction in the field of drug abuse Providing a comprehensive and informed assessment of the Europeanization process in the field of health policies this book will be of interest to students and scholars of health European integration and policy making

Ethical Issues in Maternal-Fetal Medicine

Donna Dickenson, 2002-02-07 This book addresses the ethical problems in maternal fetal medicine which impact directly on clinical practice

Biolaw and Policy in the Twenty-First Century Erick Valdés, Juan Alberto Lecaros, 2019-01-24 This book offers an impressive collection of contributions on the epistemology of international biolaw and its applications both in the legal and ethical fields Bringing together works by some of the world's most prominent experts on biolaw and bioethics it constitutes a paradigmatic text in its field In addition to exploring various ideologies and philosophies including European American and Mediterranean biolaw traditions it addresses controversial topics straight from today's headlines such as

genetic editing the dual use dilemma and neurocognitive enhancement The book encourages readers to think objectively and impartially in order to resolve the ethical and juridical dilemmas that stem from biotechnological empowerment and biomedical techniques Accordingly it offers a valuable resource for courses on biolaw law bioethics and biomedical research as well as courses that discuss law and the biosciences at different professional levels e g in the courts biomedical industry pharmacological companies and the public space in general

Critical Companion to Contemporary Marxism Jacques Bidet, 2008 International and interdisciplinary in range and scope the *Critical Companion to Contemporary Marxism* provides a thorough and precise panorama of recent developments in Marxist theory in the US Europe and beyond **From Revolution to Ethics, Second Edition** Julian Bourg, 2017-11-28 Winner CHOICE Outstanding Academic Book Award CHOICE Magazine 2008 Winner Morris D Forkosch Prize for the best book in intellectual history Journal of the History of Ideas 2008 The French revolts of May 1968 the largest general strike in twentieth century Europe were among the most famous and colourful episodes of the twentieth century Julian Bourg argues that during the subsequent decade the revolts led to a remarkable paradigm shift in French thought the concern for revolution in the 1960s was transformed into a fascination with ethics Challenging the prevalent view that the 1960s did not have any lasting effect *From Revolution to Ethics* shows how intellectuals and activists turned to ethics as the touchstone for understanding interpersonal institutional and political dilemmas In absorbing and scrupulously researched detail Bourg explores the developing ethical fascination as it emerged among student Maoists courting terrorism anti psychiatric celebrations of madness feminists mobilizing against rape and pundits and philosophers championing humanitarianism *From Revolution to Ethics* provides a compelling picture of how May 1968 helped make ethics a compass for navigating contemporary global concerns In a new preface for the second edition published to mark the fiftieth anniversary of the events Bourg assesses the worldwide influence of the ethical turn from human rights to the return of religion and the new populism

Personhood and Health Care David C. Thomasma, David N. Weisstub, Christian Hervé, 2013-04-17 PERSONHOOD AND HEALTH CARE This book arose as a result of a pre conference devoted to the topic held June 28 1999 in Paris France The pre conference preceded the Annual Congress of the International Academy of Law and Mental Health Other chapters were solicited after the conference in order to more completely explore the relation of personhood to health care The pre conference was held in honor of Yves Pelicier who led so many of our French colleagues in medicine philosophy and ethics as Christian Herve notes in his Tribute As health care is aimed at healing persons it is important to realize how difficult it is to

construct a theory of personhood for health care and thus a theory of how healing in health care comes about or ought to occur The book is divided into four parts Concepts of the Person Theories of Personhood in Relation to Health Care and Bioethics Person and Identity and Personhood and His Relations Each section explores a critical arena in constructing the relation of personhood to health care Although no exploration of this nature can be exhaustive every effort was made to present both conflicting and complementary views of personhood from within similar and different philosophical and religious traditions PART ONE CONCEPTS OF THE PERSON Tracing the origins of the concept of person from antiquity through present day Jean Delemeau provides an historical sketch of the development of a wide range of meanings

Assisted Human Reproduction Dani Singer, Myra Hunter, 2006-02-22 With contributions from Eric Blyth Ken Daniels Julia Feast Robert Lee Nina Martin Alexina McWhinnie Derek Morgan Clare Murray Sharon Pettle Claire Potter Jim Richards and Francoise Shenfield The separation of procreation from conception has broadened notions of parenthood and created novel dilemmas A woman may carry a foetus derived from gametes neither or only one of which came from her or her partner or she may carry a foetus created using in vitro fertilisation IVF with the purpose of handing it to two other parents one neither or both of whom may be genetically related to the prospective child Parents may consist of single sex couples only one of them genetically related to the child the prospective mother may be past her menopause and genetic parenthood after death is now achievable In a world increasingly reliant on medical science how can the argument that equates traditional with natural and novel with unnatural unethical be justified Should there be legislation which is notoriously slow to change in a field driven by dazzling new possibilities at ever faster rate particularly when restrictions differ from country to country so that those who can afford it travel elsewhere for their treatment of choice Whose rights are paramount the adults hoping to build a family or the prospective child ren s future well being On what basis can apparently competing rights be regulated or adjudicated and how and to what extent can these be enforced in practice *Embryo Politics* Thomas Banchoff, 2011-05-15 Since the first fertilization of a human egg in the laboratory in 1968 scientific and technological breakthroughs have raised ethical dilemmas and generated policy controversies on both sides of the Atlantic Embryo stem cell and cloning research have provoked impassioned political debate about their religious moral legal and practical implications National governments make rules that govern the creation destruction and use of embryos in the laboratory but they do so in profoundly different ways In *Embryo Politics* Thomas Banchoff provides a comprehensive overview of political struggles about embryo research during four decades in four countries the United States the United Kingdom Germany and France Banchoff s book the first of its kind demonstrates the impact of particular national histories and institutions on very different patterns of national governance Over time he argues partisan debate and religious secular polarization have come to overshadow ethical reflection and political deliberation on the moral status of the embryo and the promise of biomedical research Only by recovering a robust and public ethical debate will we be able to govern revolutionary life science technologies effectively and

responsibly into the future **A Textbook of In Vitro Fertilization and Assisted Reproduction** Peter R. Brinsden, 2005-08-12 This major book known as The Bourn Hall Textbook evolved from teaching courses held at this prestigious Clinic one of the birthplaces of IVF and clinical reproductive medicine The content is comprehensive covering assessment of the infertile couple and both laboratory and clinical aspects of assisted reproductive technologies The emphasis throughout is on the practical management of patients undergoing assisted conception treatment The third edition is a complete update of the field including expanded sections on newer technologies such as GIFT and ICSI The book is authored largely by current or previous members of the Bourn Hall staff with additional material from leading international authorities The Bourn Hall Procedures Protocols and Information Sheets previously published as an Appendix are now included on CD ROM for ease of adaptation for local use *Care in Technology* Xavier Guchet, 2021-04-27 Today it is widely recognized that in order to meet environmental challenges it will not simply be enough to make our lifestyles greener also critical is putting an end to the modern conception of the human as master and possessor of nature However to bear fruit this change in anthropology must also be accompanied by a revision in our conception of technology Since the Enlightenment and the development of industrialization technology no longer seems to be subject to the guiding principles set by the Greeks prudence and the search for the right measure in all which leads to the care of beings and the world *Care in Technology* analyzes the historical changes that have led technology to become an unthinkable part of care and care an unthinkable part of technology It also establishes the conditions for care to once again become a regulatory principle of the activity of engineers who design technology **Compromis, dilemmes et paradoxes en éthique clinique** Jean-François Malherbe, 1999 **Pour une bioéthique clinique** Pierre Boitte, Bruno Cadoré, Dominique Jacquemin, Sergio Zorrilla, 2003-01-30 Le propos de cet ouvrage est d'élargir le champ habituel de la réflexion bioéthique par l'inscription de la réflexion critique au cœur même du déploiement de la pratique médicale Cette inscription se heurte certaines difficultés dues aux ambiguïtés de la démarche bioéthique qu'il convient dès lors d'analyser pour dégager les conditions d'une pensée critique propos de la médecine et proposer un engagement dans la recherche bioéthique comme devoir social **Les manipulations génétiques** Charles Susanne, 1997-10 L'instauration de nouvelles techniques telles que la biotechnologie si elles ne sont pas accompagnées d'informations correctes et de réflexion risque d'être mise en péril car elle pourrait conduire des décisions non claires et donc non démocratiques En effet les concepts de manipulations recombinaisons génétique génétique touchent au fondement même de la vie et donc des opinions philosophiques intimes Médecins chercheurs philosophes et juristes d'horizons divers expriment leurs pensées versant ainsi tous les éléments importants au dossier d'un débat dont dépend la configuration même de nos sociétés futures *Émergence, complexité et dialectique* Lucien Sève, Janine Guespin-Michel, 2005-04-21 Fruit d'un travail collectif entre des scientifiques et un philosophe ce livre a pour première originalité de se centrer sur ce qu'on y tient pour le cœur même de la complexité la dynamique des systèmes non linéaires ou les

Roche, 2018-06-14 Marxism Psychology and Social Science Analysis applies Marxist theory psychology and the work of Lucien
S ve to specific research in the social sciences It shows in practical terms what guidance can be offered for social scientific
researchers wanting to incorporate S ve's view of personality into their work Providing case studies drawn from different
social sciences that give the book significant breadth of scope Roche reviews the impact of Taking S ve Seriously across the
study of international relations theory economics law and moral philosophy The book begins by placing the work of Lucien S
ve in context and considers the development of psychology in relation to Marxism before going on to summarise the work of
S ve in relation to the psychology of personality It considers the opportunities for refreshed research in social relations based
on developments by S ve before examining Marxist biography and the implications of S ve's views The book also includes
chapters on the social discount rate on constructivism in international relations on the concept of promising in moral
philosophy and the Marxist conception of individual responsibility It addresses not only how research should be carried out
differently but whether utilising the theoretical framework of other writers even non Marxists can deliver a similar outcome
With its use of five distinct case studies to analyse the work of Lucien S ve this unique book will be of great interest to
academics researchers and postgraduate students in the fields of psychology philosophy and social sciences
