### The Ring-Tailed Lemur

- 1 Have you ever heard of a ring-tailed lemur? These fascinating creatures live in Madagascar, an island off the coast of Africa. Let's learn more about them and their unique features!
- 2 Ring-tailed lemurs are known for their long bushy tails with distinct black and white rings, as well as their dark eye patches. These tails help them keep balance as they leap and climb through the trees of the Madagascar forests. Lemurs are climbers, using their strong legs and grasping hands to swing swiftly from branch to branch. They're also social animals, found living in groups called troops. Within these troops, they communicate with each other through a variety of sounds, even scent marking. They have a special gland on their tails that they use to spread their scent and mark their territory.
- 3 When it comes to food, ring-tailed lemurs are omnivores. They enjoy munching on fruits, leaves, flowers, and insects. With their keen sense of smell, they can find treats in their forest habitat.
- 4 But lemurs face challenges, too. The Madagascar forests are shrinking due to deforestation, which means they have less space to live. Additionally, they face threats from poachers and climate change.

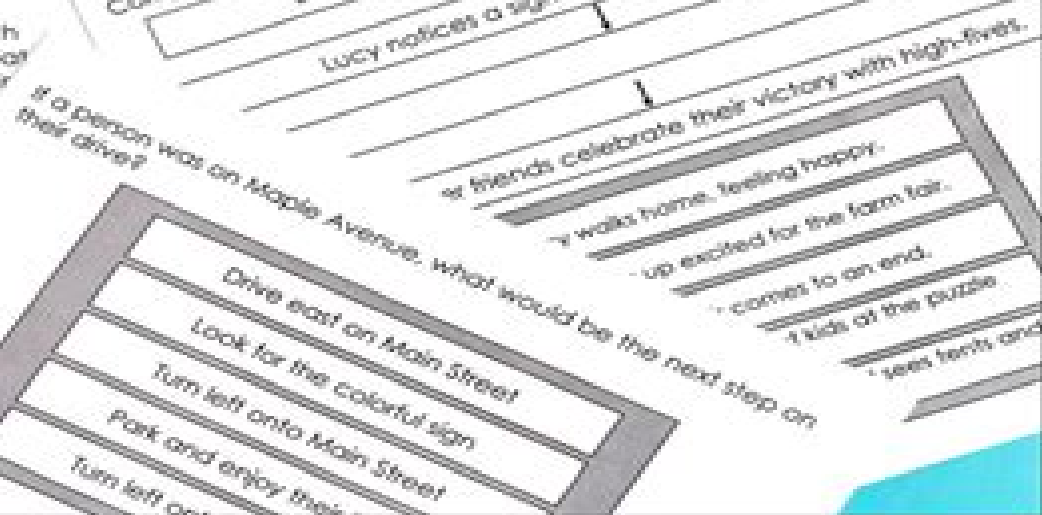

Based on the story, the author most likely believes that working together with friends can be more enjoyable than riding ponies.

The best part of a farm fair is winning prizes.

Farm animals are the main attraction at a farm fair.

Farm fairs are only fun if they have lots of rides and games.
