In 1912 the British Captain Robert Falcon Scott and his men were caught in a fierce snowstorm and perished while returning to their base camp, after reaching the South Pole. Their tent, buried under snow was discovered the following year by Sir Ernest. He handed over a letter written by Scott to his author - friend, James Barrie. After describing the snowstorm and their impending doom, Scott wrote that he and his colleagues were spending the time singing songs and making pleasant conversations. Below these lines he had also written in bold letters, one word- COURAGE. When he returned to England, the letter was handed over to Sir James Barrie who read it and kept it in a box.

A few years later Sir James developed some defect in his right hand because of which he could not hold a pen. The author despaired of ever being able to write again. One day, in a despondent mood, he took out Scott's letter and read it again. It lifted his spirits and set him thinking. If Scott and his men could remain cheerful in the face of death, could he too not learn to face adversity bravely? He picked up his pen and began practicing writing with his left hand. In a few weeks he could write perfectly well with it and he thought he would write again when pigs fly.

Visual language Wendy Sandler, Marianne Gullberg, Carol Padden, 2019-11-04 Traditionally research on human language has taken speech and written language as the only domains of investigation However there is now a wealth of empirical studies documenting visual aspects of language ranging from rich studies of sign languages which are self contained visual language systems to the field of gesture studies which examines speech associated gestures facial expressions and other bodily movements related to communicative expressions But despite this large body of work sign language and gestures are rarely treated together in theoretical discussions This volume aims to remedy that by considering both types of visual language jointly in order to transcend artificial theoretical divides and to arrive at a comprehensive account of the human language faculty This collection seeks to pave the way for an inherently multimodal view of language in which visible actions of the body play a crucial role The 19 papers in this volume address four broad and overlapping topics 1 the multimodal nature of language 2 multimodal representation of meaning 3 multimodal and multichannel prosody and 4 acquisition and development of visual language in children and adults
