Outcomes/Goals from IFSP/IEP: Max will eat a variety of food and feed himself using utensils in order to participate in mealtime routines.												
Child and Family Outcome Update: Max is able to pick up small pieces of food and put them into his mouth. He is able to eat soft foods. He will play with the spoon when Mom gives it to him.												
What we did today to address the outcomes include how intervention was embedded within activities and routines, family participation and how strategies were used. An OT student observed this session. Max initially stared at the OT student but then he warmed up and smiled at her. During lunch, Max sits in his high chair and his cousin, Matilda, sits at the table. While waiting for Mom to bring lunch to the table, Matilda made silly faces at Max, making him laugh. Once Mom delivered lunch, Mom began feeding Max. The OT demonstrated for Mom how using a child size fork and giving Max hand over hand assistance will help him to learn how to get food onto the fork and then into his mouth. When Matilda finished eating, Mom clapped for Matilda because she ate all of her fruit. Max clapped too. Matilda then left the room, Mom called her name so she could clean up after herself. Max looked in the direction Matilda walked in and vocalized toward her. After lunch, the OT demonstrated for Mom how to support Max in sitting on the floor using her hands or a boppy pillow. While Mom supported Max, he was able to roll a ball back and forth with Matilda. Progress Information/data collection: Max is able to pick up food with his fingers and feed himself soft textures. We will collect data on the types of textures Max is eating and how much assistance he needs to feed himself with utensils.					Plans for next session and opportunities for practice: Mom will encourage Max to use the child fork and give him assistance in putting food on the fork and then into his mouth. Next session, Max will work on improving his ability to put objects into a container.
