**Fundamental Considerations in Technology Mediated Language Assessment** Karim Sadeghi, Dan Douglas, 2023-04-27 Fundamental Considerations in Technology Mediated Language Assessment aims to address issues such as how the forced integration of technology into second language assessment has shaped our understanding of key traditional concepts like validity reliability washback authenticity ethics fairness test security and more Although computer assisted language testing has been around for more than two decades in the context of high stakes proficiency testing much of language testing worldwide has shifted to at home mode and relies heavily on the mediation of digital technology making its widespread application in classroom settings in response to the COVID 19 outbreak unprecedented Integration of technology into language assessment has brought with it countless affordances and at the same time challenges both theoretically and practically One major theoretical consideration requiring attention is the way technology has contributed to a reconceptualization of major assessment concepts constructs There is very limited literature available on the theoretical underpinnings of technology mediated language assessment This book aims to fill this gap This book will appeal to academic specialists practitioners or professionals in the field of language assessment advanced and or graduate students and a range of scholars or professionals in disciplines like educational technology applied linguistics and teaching English to speakers of other languages TESOL

*Tiger Check* Steven A. Fino, 2017-11 The fielding of automated flight controls and weapons systems in fighter aircraft from 1950 to 1980 challenged the significance ascribed to several of the pilots historical skillsets such as superb hand eye coordination required for aggressive stick and rudder maneuvering and perfect eyesight and crack marksmanship required for long range visual detection and destruction of the enemy Highly automated systems would proponents argued simplify the pilot s tasks while increasing his lethality in the air thereby opening fighter aviation to broader segments of the population However these new systems often required new unique skills which the pilots struggled to identify and develop Moreover the challenges that accompanied these technologies were not restricted to individual fighter cockpits but rather extended across the pilots tactical formations altering the social norms that had governed the fighter pilot profession since its establishment In the end the skills that made a fighter pilot great in 1980 bore little resemblance to those of even thirty years prior despite the precepts embedded within the myth of the fighter pilot As such this history illuminates the rich interaction between human and machine that often accompanies automation in the workplace It is broadly applicable to other enterprises confronting increased automation from remotely piloted aviation to Google cars It should appeal to those interested in the history of technology and automation as well as the general population of military aviation enthusiasts Provided by publisher

*Patently Contestable* Stathis Arapostathis, Graeme Gooday, 2013-04-12 An examination of the fierce disputes that arose in Britain in the decades around 1900 concerning patents for electrical power and telecommunications Late nineteenth century Britain saw an extraordinary surge in patent disputes over the new technologies of electrical power lighting telephony and radio These battles played out in the twin tribunals of the courtroom and the press In *Patently Contestable* Stathis Arapostathis and Graeme Gooday examine how Britain's patent laws and associated cultures changed from the 1870s to the 1920s They consider how patent rights came to be so widely disputed and how the identification of apparently solo heroic inventors was the contingent outcome of patent litigation Furthermore they point out potential parallels between the British experience of allegedly patentee friendly legislation introduced in 1883 and a similar potentially empowering shift in American patent policy in 2011 After explaining the trajectory of an invention from laboratory to Patent Office to the court and the key role of patent agents Arapostathis and Gooday offer four case studies of patent centered disputes in Britain These include the mostly unsuccessful claims against the UK alliance of Alexander Graham Bell and Thomas Edison in telephony publicly disputed patents for technologies for the generation and distribution of electric power challenges to Marconi's patenting of wireless telegraphy as an appropriation of public knowledge and the emergence of patent pools to control the market in incandescent light bulbs

Product Liability Duncan Fairgrieve, Richard S Goldberg, 2020-05-20 *Product Liability* is a recognised authority in the field and covers the product liability laws through which manufacturers retailers and others may be held liable to compensate persons who are injured or who incur financial loss when the products which they manufacture or sell are defective or not fit for their purpose Product defects may originate in the production process be one of design or be grounded in a failure to issue an adequate warning or directions for safe use and practitioners advising business clients or claimants will find this book provides all the necessary information for practitioners to manage a product liability claim This new edition has been fully updated to take account of 10 years of development in case law and regulation and the increasing impact of cross border and transnational sale of goods The Court of Justice of the European Union handed down major rulings concerning the Product Liability Directive which affect the application of the Directive and national arrangements and Fairgrieve and Goldberg examines this in detail For any legal practitioner operating in areas which require knowledge of European product liability law an understanding of the impact of recent developments is essential and this work is an essential resource for practitioners working on product liability sale of goods personal injury and negligence The work provides comprehensive coverage of the law of negligence as it applies to product liability of the strict liability provisions of the Consumer Protection Act 1987 and of the EU's Product Liability Directive on which the Act is based Although the majority of cases involve pharmaceuticals and medical devices in recent

English cases the allegedly defective products have been as diverse as a child's buggy, an All Terrain Vehicle and even a coffee cup. Many cases are brought as group actions and the book examines the rights of those who are injured by defective products. As well as considering the perspective of the law as it has developed in the UK, this edition contains detailed discussion of case law from other jurisdictions including the USA, Australia, New Zealand, Canada, France and Germany. The coverage in the work is complemented by a full analysis of issues which arise in transnational litigation involving problems of jurisdiction and the choice of laws.

**We Are Best Friends: Animals in Society** Leslie Irvine, 2019-10-01. Friendships between humans and non-human animals were once dismissed as sentimental anthropomorphism. After decades of research on the emotional and cognitive capacities of animals, we now recognize human-animal friendships as true reciprocal relationships. Friendships with animals have many of the same characteristics as friendships between humans. Both parties enjoy the shared presence that friendship entails along with the pleasures that come with knowing another being. Both friends develop ways of communicating apart from or in addition to spoken language.
