

Research methodology

3.1 INTRODUCTION

In this chapter the research methodology used in the study is described. The geographical area where the study was conducted, the study design and the population and sample are described. The instrument used to collect the data, including methods implemented to maintain validity and reliability of the instrument, are described.

3.2 RESEARCH APPROACH AND DESIGN

A quantitative approach was followed. Burns and Grove (1993:777) define quantitative research as a formal, objective, systematic process to describe and test relationships and examine cause and effect interactions among variables. Surveys may be used for descriptive, explanatory and exploratory research. A descriptive survey design was used. A survey is used to collect original data for describing a population too large to observe directly (Mouton 1996:232). A survey obtains information from a sample of people by means of self-report, that is, the people respond to a series of questions posed by the investigator (Polit & Hungler 1993:148). In this study the information was collected through self-administered questionnaires distributed personally to the subjects by the researcher.

A descriptive survey was selected because it provides an accurate portrayal or account of the characteristics, for example behaviour, opinions, abilities, beliefs, and knowledge of a particular individual, situation or group. This design was chosen to meet the objectives of the study, namely to determine the knowledge and views of patients and family members with regard to diabetes mellitus and its treatment regimen (Burns & Grove 1993:29).

3.3 RESEARCH SETTING

The study was conducted at Nkhensani Hospital and Giyani Health Centre which fall under the Lowveld Region, Mopani District in the Limpopo Province (RSA). The hospital has an average bed occupancy of 253. It caters for the health needs of people who are referred to it from 20 clinics. The majority of the clients are black. Giyani Health Centre has a bed occupancy of 10 and is 2.5 km south-east of Nkhensani Hospital. It refers its clients to Nkhensani.
