## Location and Mounting

### Location

The locations of Magellan and its wireless transmitters affect the overall performance of the wireless system. To ensure the best signal reception, the following list of location criteria should be respected whenever possible:

- Select an installation site that is free of obstacles that reflect and absorb radio frequency (RF) signals, as well as interference that may distort signals. Avoid installation near or in the path of strong RF fields (i.e., neon lights, computers), and on or near metal objects, circuit breaker boxes, air conditioners and heater ducts since they may cause interference and reduce the console's sensitivity.
- Select a site that is not susceptible to drastic temperature changes.
- Mount the Magellan console as central as possible to the proposed placement of the wireless transmitters.
- Mount the Magellan console as high as possible.
- Avoid installing Magellan in the basement as the range of the console is reduced when installed below ground level. However, if it is absolutely necessary to install the console in the basement, install the console as high as possible.
- Install the Magellan console on a wall allowing at least 5cm (2") around the console to permit adequate ventilation and heat dissipation.

### The Wall Plate

Magellan uses a plastic wall plate to stay mounted on a wall. The wall plate is also used for tabletop mounting to cover the back of the console as well as keep any wires within their respective wire slots. After choosing an appropriate location (see Location on page 11), mount the wall plate onto the Magellan console with two screws as described in Mounting Magellan on the Wall on page 11 or Tabletop Mounting on page 12.

Figure 15: Mounting Magellan onto the Wall Plate

Figure 16: Magellan's Back Plate

### Mounting Magellan on the Wall

Magellan can be mounted on a wall by first securing the wall plate (see The Wall Plate on page 11) to the wall and then mounting the Magellan console on the secured wall plate as shown in Figure 15 on page 11 and Figure 16 on page 11. To do so:

1. Place the wall plate on the desired spot of the wall.
2. Drill and insert screws into holes labeled **A** as shown in Figure 14 on page 11.
3. Place the console back plate flush against the mounted wall plate.
