Libicki,2025-05-02 A reevaluation of conflict thresholds in the context of complex cyber conventional and nuclear war The return of great power competition has renewed concerns about managing escalation lest a minor crisis inadvertently spiral into nuclear war This

has become apparent during the war between Russia and Ukraine as Western aid for Ukraine has been predicated on avoiding Russian escalation. The New Calculus of Escalation updates our understanding of conflict escalation dynamics for the twenty first century with the goal of reducing the possibility of a catastrophic war. To improve mutual understanding among states Libicki rethinks conflict thresholds and exit ramps that manage escalation. During the Cold War there were two critical thresholds one between peace and war and one between conventional war and nuclear war. But ongoing developments in cyber and other advanced military technologies threaten command and control and blur the old thresholds. Military strategists international relations scholars and graduate students will benefit from this book's cogent analytic framework in shaping future debates.

The Big Hop David Rooney,2025-06-03 The inspiring story of a pathbreaking 1919 flight and the courageous fliers who risked their lives to make aviation history In 1919 in Newfoundland four teams of aviators came from Britain to compete in the Big Hop an audacious race to be the first to fly nonstop across the Atlantic Ocean One pair of competitors was forced to abandon the journey halfway and two pairs never made it into the air Only one team after a death defying sixteen hour flight made it to Ireland Celebrated on both continents the transatlantic contest offered a surge of inspiration and a welcome distraction to a public reeling from the Great War and the influenza pandemic But the seven airmen who made the attempt were quickly forgotten their achievement overshadowed by the solo Atlantic flights of Charles Lindbergh and Amelia Earhart years later In The Big Hop David Rooney grants the pioneering aviators of 1919 the spotlight they deserve From Harry Hawker the pilot who as a young man had watched Houdini fly over his native Australia to the engineer Ted Brown a US citizen who joined the Royal Flying Corps Rooney traces the lives of the unassuming men who performed extraordinary acts in the sky Mining evocative first person accounts and aviation archives Rooney also follows the participants journeys learning to fly on flimsy airplanes made of timber struts and varnished fabric surviving the bloodiest war that Europe had ever yet seen and battling faulty coolant systems severe storms and extreme fatigue while attempting the Atlantic Rooney transports readers to the world in which the great contest took place and traces the rise of aviation to its daredevil peak in the early decades of the twentieth century Recounting a deeply moving adventure The Big Hop explores why flights like these matter and why we take to the skies

Spheres of Influence in International Relations Susanna Hast,2016-04-01 Current events happening around the world especially the humanitarian interventions by NATO and the West within the context of the so called Arab Spring make the understanding of the role of spheres of influence in international politics absolutely critical Hast explores the practical implications and applications of this theory challenging the concept by using historical examples such as suzerainty and colonialism as well as the emergence of a hierarchical international order This study further connects the English School tradition post war international order the Cold War and images of Russia with the concept of the sphere of influence to initiate debate and provide a fresh outlook on a concept which has little recent attention

The Making of the Cold War Enemy Ron Theodore Robin,2009-04-30 At the height of the Cold War the U S government enlisted the aid of a select group of psychologists sociologists and political scientists to blueprint enemy behavior Not only did these academics bring sophisticated concepts to what became a project of demonizing communist societies but they influenced decision making in the map rooms prison camps and battlefields of the Korean War and in Vietnam With verve and insight Ron Robin tells the intriguing story of the rise of behavioral scientists

in government and how their potentially dangerous American assumptions about human behavior would shape U S views of domestic disturbances and insurgencies in Third World countries for decades to come Based at government funded think tanks the experts devised provocative solutions for key Cold War dilemmas including psychological warfare projects negotiation strategies during the Korean armistice and morale studies in the Vietnam era Robin examines factors that shaped the scientists thinking and explores their psycho cultural and rational choice explanations for enemy behavior He reveals how the academics intolerance for complexity ultimately reduced the nation s adversaries to borderline psychotics ignored revolutionary social shifts in post World War II Asia and promoted the notion of a maniacal threat facing the United States Putting the issue of scientific validity aside Robin presents the first extensive analysis of the intellectual underpinnings of Cold War behavioral sciences in a book that will be indispensable reading for anyone interested in the era and its legacy

Teaching and Testing Martin James Stormzand,1925 *Parameters* ,1972 *The Economic Performance Index (EPI)* Mr.Vadim Khramov,Mr.John Ridings Lee,2013-10-23 Existing economic indicators and indexes assess economic activity but no single indicator measures the general macro economic performance of a nation state or region in a methodologically simple and intuitive way This paper proposes a simple yet informative metric called the Economic Performance Index EPI The EPI represents a step toward clarity by combining data on inflation unemployment government deficit and GDP growth into a single indicator In contrast to other indexes the EPI does not use complicated mathematical procedures but was designed for simplicity making it easier for professionals and laypeople alike to understand and apply to the economy To maximize ease of understanding we adopt a descriptive grading system In addition to a Raw EPI that gives equal weights to its components we construct a Weighted EPI and show that both indexes perform similarly for U S data To demonstrate the validity of the EPI we conduct a review of U S history from 1790 to 2012 We show that the EPI reflects the major events in U S history including wars periods of economic prosperity and booms along with economic depressions recessions and even panics Furthermore the EPI not only captures official recessions over the past century but also allows for measuring and comparing their relative severity Even though the EPI is simple by its construction we show that its dynamics are similar to those of the Chicago Fed
