Sports Engineering and Computer Science Qi Luo,2015-05-18 Sports Engineering and Computer Science contains papers presented at the 2014 International Conference on Sport Science and Computer Science

SSCS 2014 held September 16 17 2014 in Singapore and at the 2014 International Conference on Biomechanics and Sports Engineering BSE 2014 held October 24 25 2014 in Riga Latvia The contributions have been published in **Daily Graphic** Kingsley Inkoom, 2014-09-04

A Living History of Immunology Kendall Arthur Smith, 2015-11-04 In the highly competitive world of biomedical science often the rush to publish and to be recognized as first with a new discovery concept or method is lost in the hurly burly of the moment as the maddening crowd moves on to the next new thing One of the great things about immunology today is that it has only become mature as a science within the last half century and especially within the past 35 years as a consequence of the revolution of molecular immunology which has taken place only since 1980 Consequently most of those who have contributed to our new understanding of how the immune system functions are still alive and well and still contributing Thus *A Living History of Immunology* collates many stories from the investigators who actually performed the experiments that have established the frontiers of immunology Accordingly this volume combats revisionist science by those who want to alter history by telling the stories a different way than actually happened In this regard one of the good things about science vs other disciplines is that we have the written record of what was done when it was done and by whom Even so we do not have the complete story or narrative of how and why experiments were done and what made the differences that led to success This volume captures and chronicles some of these stories from the past fifty years in immunology

The Problem of Social Inequality Scott G. McNall, 2015-12-07 Within and among nations rising levels of social inequality threaten our collective future Currently upwards of 80% of people's life chances are determined by factors over which they have absolutely no control Social inequality threatens the democratic project because it destroys the trust on which governments depend and it gives rise to corrupt political and economic institutions How can we get out of the traps we have created for ourselves We need to reboot capitalism Drawing on diverse examples from a range of countries McNall explains the social economic and ecological traps we have set for ourselves and develops a set of rules of resilience that are necessary conditions for the creation and maintenance of democratic societies and a set of rules essential for creating a sustainable future

National Library of Medicine Current Catalog National Library of Medicine (U.S.), 1972 First multi year cumulation covers six years 1965 70

Indira Gandhi and the Years That Transformed India Srinath Raghavan, 2015-05-30 Indira Gandhi's ascent as prime minister of India in 1966 was entirely unforeseen But she soon emerged as one of the most powerful political leaders of her times who transformed the world's largest democracy She served as prime minister for a remarkable fifteen years leaving behind a complex and deeply controversial legacy In this fascinating account Srinath Raghavan tells the story of Indira Gandhi's political career and the momentous changes that India experienced under her leadership From her tentative start in high office to her remarkable electoral victories the dark days of the Emergency of 1975 77 and her assassination at the hands of her bodyguards in 1984 Raghavan sheds new light on her politics and government as well as on her adversaries and critics He shows how the 1970s were the hinge on which

the history of the country turned and how Indira Gandhi transformed the new postcolonial nation into the India of today

Biotechnological Innovations for Sustainable Biodiversity and Development Ranbir Chander Sobti,2025-03-31 This book reviews the important role of biotechnological innovations in achieving sustainable development goals and conserving global biodiversity It presents the latest biotechnological techniques used to identify and characterize various groups of plants and animals such as genomic tools for animal identification and DNA barcoding for precise plant characterization It also reviews the utility of proteomics and metabolomics in enhancing our understanding of diverse species The book also discusses responsible development and sustainable utilization of bioresources including strategies for conserving and managing bioresources bioprospecting for novel biodiscoveries and sustainable agricultural practices to preserve agrobiodiversity Further the book addresses the pressing challenges faced by biodiversity including the far reaching effects of climate change the threat posed by invasive species the consequences of pollution on biodiversity degradation and the interplay between diseases and biodiversity decline Toward the end the book analyzes the impact of environmental degradation on biodiversity and explores emerging technologies in biodiversity conservation focusing on genetically modified organisms GMOs The book will interest scientists researchers policymakers environmentalists academics and students involved in biotechnology ecology genetics and conservation biology Key Features Discusses cutting edge biotechnological innovations for biodiversity conservation Presents cutting edge biotechnological techniques for identifying and characterizing selected groups of plants and animals Addresses critical environmental challenges such as climate change invasive species and pollution

Russian Fractals in Indigenous Artifacts Abdul Karim Bangura,Leonid

A. Zhigun, 2025-06-22 This book is the first comprehensive work on Russian Fractals in indigenous artifacts While existing works focus on universal phenomena such as liquid crystal or finance none explore the intersection between Fractals and Russia Russian Fractals in Indigenous Artifacts therefore investigates how indigenous Russian cultures have a wonderful Fractal heritage that was originally tied to socially just and ecologically sustainable social practices including those of indigenous northern groups such as the Yakut Fractal designs originally allowed unalienated value both human and nonhuman to be visible thereby enabling just and sustainable living This book also examines how the tsarist elite encouraged the creation of unique creative masterpieces developing and strengthening traditional crafts and art of indigenous people hence Fabergé or imperial architecture Today the challenge for contemporary Russia is to reestablish the relationship between the social and ecological sustainability of indigenous cultures and practices for which we can now provide modeling and analysis Lay attempts at this have only limited success as they have based the attempts on a purely religious basis which recognizes the ecological aspects but often succumbs to authoritarian nationalism However the freely accession of indigenous peoples to Russia for the sake of national liberation has had a positive effect on enriching them with spirituality and creativity by Fractal artifacts through friendly exchanges with one another In Russian Fractals in Indigenous Artifacts Bangura and Zhigun express why there is a need for a forward thinking Fractal renaissance in Russia bringing together contemporary computational and scientific analyses with these ecologically and socially sustainable traditions

The Politics of Drug Violence Angélica Durán-Martínez, 2018 Over the last few decades drug trafficking organizations in Latin America became infamous for their shocking public crimes from narcoterrorist assaults on the Colombian political system in the 1980s to the more recent wave of beheadings in Mexico However while these highly visible forms of public violence dominate headlines they are neither the most common form of drug violence nor simply the result of brutality Rather they stem from structural conditions that vary from country to country and from era to era In The Politics of Drug Violence Angelica Durán-Martínez shows how variation in drug violence results from the complex relationship between state power and criminal competition Drawing on remarkably extensive fieldwork this book compares five cities that have been home to major trafficking organizations for the past four decades Cali and Medellín in Colombia and Ciudad Juárez and Tijuana in Mexico She shows that violence escalates when trafficking organizations compete and the state security apparatus is fragmented However when the criminal market is monopolized and the state security apparatus cohesive violence tends to be more hidden and less frequent The size of drug profits does not determine violence levels and neither does the degree of state weakness Rather the forms and scale of violent crime derive primarily from the interplay between marketplace competition and state cohesiveness An unprecedentedly rich empirical account of one of the worst problems of our era the book will reshape our understanding of the forces driving organized criminal violence in Latin America and elsewhere

Coronavirus Disease (COVID-19): Psychological Reactions to the Pandemic Joanna Sokolowska, Peter Ayton, Eduard

Brandstätter,2021-10-14 Energy and the Environment Cost-Benefit Analysis R.A. Karam,K.Z. Morgan,2014-05-18 Energy and the Environment Cost Benefit Analysis originates from a conference the objective of which is to set a global standard to measure the cost and benefit of human s production of energy The book focuses on the analysis of the societal and ecological effects of such a production It also enumerates some existing sources of energy The book begins with a discussion on the survey of world energy resources This topic is followed by a discussion on the utilization of fossil fuel A separate chapter focuses on the advantages and disadvantages of fusion power The next section tackles the formation of solar energy systems for the production of electricity Another section of the book is devoted to the effects of technological change and economic factors on supply and use of energy sources and production The text can serve as a valuable tool for executives and engineers from the power industry educators scientists environmentalists students and researchers in the field of energy creation and conservation **Canadian Journal of Fisheries and Aquatic Sciences** ,2014 **Focus On: 100 Most Popular American Stage Actresses** Wikipedia contributors, ████████████████████ ████████(Mauro F. Guillén),2023-11-07 Amazon TOP2 2030 60 30 10 18 34 33 2030 40 60 60 70 30 30 35 46 30 62 20 50 60 AI **XIII Mediterranean Conference on Medical and Biological Engineering and Computing 2013** Laura M. Roa Romero,2013-10-01 The general theme of MEDICON 2013 is Research and Development of Technology for Sustainable Healthcare This decade is being characterized by the appearance and use of emergent technologies under development This situation has produced a tremendous impact on Medicine and Biology from which it is expected an unparalleled evolution in these disciplines towards novel concept and practices The consequence will be a significant improvement in health care and well fare i e the shift from a reactive medicine to a preventive medicine This shift implies that the citizen will play an important role in the healthcare delivery process what requires a comprehensive and personalized assistance In this context society will meet emerging media incorporated to all objects capable of providing a seamless adaptive anticipatory unobtrusive and pervasive assistance The challenge will be to remove current barriers related to the lack of knowledge required to produce new opportunities for all the society while new paradigms are created for this inclusive society to be socially and economically sustainable and respectful with the environment In this way these proceedings focus on the convergence of biomedical engineering topics ranging from formalized theory through experimental science and technological development to practical clinical applications
