Supporting Big Data Applications* Marco X. Bornschlegl,Felix C. Engel,Raymond Bond,Matthias L. Hemmje,2016-12-15 This book constitutes the thoroughly refereed post workshop proceedings of the AVI 2016 Workshop on Road Mapping Infrastructures for Advanced Visual Interfaces Supporting Big Data Applications in Virtual Research Environments AVI BDA 2016 held in Bari Italy in June 2016 The 10 revised full papers in this volume present the elaborated outcome of the initial position papers capturing the results of the roadmapping discussions in the workshop at which comments of several external reviewers for these full publications were also integrated      **Nuclear Science Abstracts** ,1973      **Scientific and Technical Aerospace Reports** ,1984

*Readings in Computer Vision* Martin A. Fischler,Oscar Firschein,2014-06-28 The field of computer vision combines techniques from physics mathematics psychology artificial intelligence and computer science to examine how machines might construct meaningful descriptions of their surrounding environment The editors of this volume prominent researchers and leaders of the SRI International AI Center Perception Group have selected sixty papers most published since 1980 with the viewpoint that computer vision is concerned with solving seven basic problems Reconstructing 3D scenes from 2D images Decomposing images into their component parts Recognizing and assigning labels to scene objects Deducing and describing relations among scene objects Determining the nature of computer architectures that can support the visual function Representing abstractions in the world of computer memory Matching stored descriptions to image representation Each chapter of this volume addresses one of these problems through an introductory discussion which identifies major ideas and summarizes approaches and through reprints of key research papers Two appendices on crucial assumptions in image interpretation and on parallel architectures for vision applications a glossary of technical terms and a comprehensive bibliography and index complete the volume      *Finite Element Analysis of Solids and Structures* Sudip S.

Bhattacharjee,2021-07-18 *Finite Element Analysis of Solids and Structures* combines the theory of elasticity advanced

analytical treatment of stress analysis problems and finite element methods numerical details of finite element formulations into one academic course derived from the author's teaching research and applied work in automotive product development as well as in civil structural analysis Features Gives equal weight to the theoretical details and FEA software use for problem solution by using finite element software packages Emphasizes understanding the deformation behavior of finite elements that directly affect the quality of actual analysis results Reduces the focus on hand calculation of property matrices thus freeing up time to do more software experimentation with different FEA formulations Includes chapters dedicated to showing the use of FEA models in engineering assessment for strength fatigue and structural vibration properties Features an easy to follow format for guided learning and practice problems to be solved by using FEA software package and with hand calculations for model validation This textbook contains 12 discrete chapters that can be covered in a single semester university graduate course on finite element analysis methods It also serves as a reference for practicing engineers working on design assessment and analysis of solids and structures Teaching ancillaries include a solutions manual with data files and lecture slides for adopting professors     Applied Mechanics Reviews ,1969     Resources in Education ,2001-10
