

PERSONAL SAFETY AND SECURITY

Each Country Office should conduct a comprehensive security assessment and develop and implement a security strategy and general safety and security policies and procedures. However, every CARE staff member must view safety and security as an individual responsibility and not depend solely on the Country Office's procedures. A staff member will gain a greater sense of security and self-confidence by preparing ahead for a potential incident.

This chapter provides general safety and security guidelines that individual CARE staff members can use. Most of them are common sense measures that are frequently forgotten when in an unfamiliar environment or during crisis. Successfully employing the safety and security measures in this chapter requires resourcefulness and vigilance. It is hoped that by applying these measures within a framework of the Country Office security strategy, CARE staff can prevent safety and security incidents from ever occurring. When they do occur, the well-prepared staff member can take quick and decisive action to minimize the likelihood of injury or damage. This chapter provides information on:

Sevindik,2020-04-15 This book covers Handcuffing issues for law enforcement officer The goal is to understand and be able to perform proper techniques of using handcuffs Handcuffs are temporary restraining devices designed to control the movements of a subject Officers may routinely use handcuffs to control restrain and transport persons Restraining devices will be applied properly and in accordance with training received so as to minimize the risk of unnecessary injury The design

of handcuffs ensures that the subject's movements are controlled to reduce the risk of injury to the police officer members of the public and the subject himself. The most common types of handcuffs used in law enforcement today are the traditional and hinged variety. In addition, officers also use plastic cuffs in some situations. Handcuffs do not entirely immobilize a suspect. Regardless of the type used, it is imperative that officers be aware that the police style handcuff is a temporary restraining device and that its proper use and application is crucial for the safety of the officer and subject. Topics and techniques presented in this book will be of both great interest and great value to trainers and students of law enforcement. For Security Personnel, OFFICER SURVIVAL SKILLS, 2020 Mursel Sevindik, 2020-04-05. This book covers Officer Survival Skills issues for law enforcement officers. The goal is to develop the law enforcement officer's understanding of officer survival for the safe and efficient performance of their duty. The majority of police officers' duties become routine, though the potential for danger is always present. The duties of the officer require them to enforce laws and to control the illegal actions of certain citizens. Survival techniques, if properly applied, provide the officer an opportunity to overcome the resistive behavior of subjects. These techniques also provide officers with self-confidence, which is needed to win. When an officer uses force, peers, the public, the media, the government, and the world review that actions. If the officer applies inappropriate force, it reflects poorly on the individual and gives a non-professional appearance to the entire force. The officer is subject to legal limitations. When the officer is faced with a violent situation, it is required that he make decisions in a fraction of a second. He may have to justify his actions in court. Therefore, proper defensive tactics training provides the officer with the tools required not only to apply the proper techniques but also to decide the proper level of force necessary to overcome resistance. This will obviously enhance officer survivability, insure proper performance during the situation, and justification in court. Topics and techniques presented in this book will be of both great interest and great value to trainers and students of law enforcement.

Handbook of Police Psychology Jack Kitaeff, 2011-03-17. The Handbook of Police Psychology represents the contributions of over thirty police psychologists, all experts in their field, on the core subject matters of police psychology. Police psychology is broadly defined as the application of psychological principles and methods to law enforcement. This growing area includes topics such as screening and hiring of police officers, conducting screening for special squads, e.g., SWAT, fitness for duty evaluations, investigations, hostage negotiations, training and consultation, and stress counseling, among others. The book examines the beginnings of police psychology and early influences on the profession, such as experimental investigations of psychological testing on police attitude and performance. Influential figures in the field of police psychology are discussed, including the nation's first full-time police psychologist who served on the Los Angeles Police Department and the first full-time police officer to earn a doctorate in psychology while still in uniform with the New York Police Department.

For Security Personnel, DEFENSIVE BATON, 2020 Mürsel Sevindik, 2020-04-17. This book covers Defensive Baton issues for law enforcement officer. The goal is for the officers to understand and demonstrate the tactical fundamentals of the baton in an operational setting and its proper use as an intermediate impact weapon. One of the major dilemmas facing law enforcement today is the continually increasing number of assaults on police officers as they perform their duties. How can the officer respond to this critical situation without resorting to deadly force? Modern law enforcement tool has been developed to increase officers ability to protect themselves particularly in those cases not justifying the use of deadly force. That tool is the baton. The ability to use force lawfully against the public is the primary factor which distinguishes the police from the rest of society. The police service is unique in society as they are the only civil organization that has been given the authority to use force. As a result of this responsibility the use of force by the police comes under close scrutiny by both the public and the courts. The baton can be utilized when empty hand techniques are not effective. A trained officer who is proficient in the use of the baton is better able to protect himself and is less likely to resort to the use of his firearm. The main purpose of the baton is to stun or temporarily disable rather than cause permanent injury. The baton is not designed as a lethal weapon and is not an instrument of punishment. It is to be used in a skillful manner to counter or stop an aggressive subject. The techniques shown in this booklet has been universally accepted and are defensible in court. They are designed to work efficiently for all officers male female small large fit and the less fit. Topics and techniques presented in this book will be of both great interest and great value to trainers and students of law enforcement. Police Practices and Civil Rights in New York City United States Commission on Civil Rights, 2000. Police United States. National Advisory Commission on Criminal Justice Standards and Goals, 1973. For Security Personnel, SOFT EMPTY HAND CONTROL, 2020 Mürsel Sevindik, 2020-04-14. This book covers Soft Empty Hand Control issues for law enforcement officer. The goal is to demonstrate to officers the understanding of the principles and appropriate use of Soft Empty Hand Control techniques. Law Enforcement officers are authorized to use a range of force options to preserve the peace prevent crimes maintain order and apprehend suspects. Soft empty hand techniques are the first option of physical response used to restrain a person who is resisting. By developing a high degree of proficiency with soft empty hand techniques the officer will be able to respond in a more effective manner with a minimal amount of force. A police officer experiences different kinds of adverse situations while performing his/her duty. Sometimes his/her own life may be threatened due to a suspect's actions. Therefore it is essential for the officer to know defensive tactics to protect him/her and to control adverse situations. In modern society

police have different responsibilities such as crime investigation providing security crime control etc Therefore the officer must be aware of special tactics by which he she can defend him herself against stabbing grabbing pushing kicking using sharp and dangerous weapons and firearms Within a fraction of a second a police officer must be able to react properly otherwise it may prove to be a fatal situation Every officer must be aware of defensive tactics and should be able to apply them effectively whenever required Topics and techniques presented in this book will be of both great interest and great value to trainers and students of law enforcement

For Security Personnel, HARD EMPTY HAND CONTROL, 2020 Mürsel Sevindik,2020-04-14 This book covers Hard Empty Hand Control issues for law enforcement officer The goal is to provide police officers with an understanding of the principles of Hard Empty Hand Control techniques Hard Empty Hand Control techniques are defined as striking techniques These techniques are used to control active aggression with empty hands and feet when the intermediate use of weapons is justified but are not tactically available The term hard is descriptive of the nature of the technique Hard empty hand strikes are always defensive not offensive These techniques are taught to protect lives from immediate danger All hard empty hand control techniques are basic in nature however they address non lethal use of force situations and are generally reliable and effective when properly utilized Police officers should learn and demonstrate knowledge of the striking areas as well as methods of striking When these techniques become necessary loud clear repetitive verbal commands are an important aspect of the control process The subject needs to know what the officer desires him her to do In addition verbal and physical de escalation is always preferred and should be attempted if applicable In training safety is paramount Perfect practice makes perfect Proper technique is more important than the speed of technique application Proficiency will increase the speed proportionally Topics and techniques presented in this book will be of both great interest and great value to trainers and students of law enforcement
