In fact optional chapters are added for the benefit of schools where physics occurs in 10th or 11th grade and students can move more quickly through the material Mathematical problems are rigorous and challenging but only assume that students are taking Algebra I concurrently The text is not suitable for an upper level vector trig physics course for a vector based text see our book Physics Modeling Nature A common question we hear goes something like Is this text a real physics course Understandably people wonder if a freshman level physics course will count will it be a full credit will students be short changed The answer is Yes this is a full physics course that counts a full science credit In fact if our mastery learning paradigm is followed students will know physics better at the end of the course than with any other method
