Nunn, 2014-04-15 The key to success our culture tells us is a combination of talent and hard work Why then do high schools that supposedly subscribe to this view send students to college at such dramatically different rates Why do students from one school succeed while students from another struggle To the usual answer an imbalance in resources this book adds a far more subtle and complicated explanation Defining Student Success shows how different schools foster dissimilar and sometimes conflicting ideas about what it takes to succeed ideas that do more to preserve the status quo than to promote upward mobility Lisa Nunn s study of three public high schools reveals how students beliefs about their own success are shaped by their particular school environment and reinforced by

curriculum and teaching practices While American culture broadly defines success as a product of hard work or talent at school intelligence is the talent that matters most Nunn shows that each school refines and adapts this American cultural wisdom in its own distinct way reflecting the sensibilities and concerns of the people who inhabit each school While one school fosters the belief that effort is all it takes to succeed another fosters the belief that hard work will only get you so far because you have to be smart enough to master course concepts Ultimately Nunn argues that these school level adaptations of cultural ideas about success become invisible advantages and disadvantages for students college going futures Some schools definitions of success match seamlessly with elite college admissions definition of the ideal college applicant while others more closely align with the expectations of middle or low tier institutions of higher education With its insights into the transmission of ideas of success from society to school to student this provocative work should prompt a reevaluation of the culture of secondary education Only with a thorough understanding of this process will we ever find more consistent means of inculcating success by any measure

Perspectives on Thinking, Learning, and Cognitive Styles Robert J. Sternberg, Li-fang Zhang, 2014-04-08 This volume presents the most comprehensive balanced and up to date coverage of theory and research on cognitive thinking and learning styles in a way that represents diverse theoretical perspectives includes solid empirical evidence testing the validity of these perspectives and shows the application of these perspectives to school situations as well as situations involving other kinds of organizations International representation is emphasized with chapters from almost every major leader in the field of styles Each chapter author has contributed serious theory and or published empirical data work that is primarily commercial or that implements the theories of others The book s central premise is that cognitive learning and thinking styles are not abilities but rather preferences in the use of abilities Traditionally many psychologists and educators have believed that people s successes and failures are attributable mainly to individual differences in abilities However for the past few decades research on the roles of thinking learning and cognitive styles in performance within both academic and nonacademic settings has indicated that they account for individual differences in performance that go well

beyond abilities New theories better differentiate styles from abilities and make more contact with other psychological literatures recent research in many cases is more careful and conclusive than are some of the older studies Cognitive learning and thinking styles are of interest to educators because they predict academic performance in ways that go beyond abilities and because taking styles into account can help teachers to improve both instruction and assessment and to show sensitivity to cultural and individual diversity among learners They are also of interest in business where instruments to assess styles are valuable in selecting and placing personnel The state of the art research and theory in this volume will be of particular interest to scholars and graduate students in cognitive and educational psychology managers and others concerned with intellectual styles as applied in educational industrial and corporate settings EBOOK: International Marketing, 5e Pervez Ghauri, Philip Cateora, 2021-08-16 In its 5th edition International Marketing guides students to understand the importance of international marketing for companies of every size and how going international can enhance value and growth It provides a solid understanding of the key principles and practices of international marketing The text has been thoroughly updated to reflect the most recent developments in the current business environment and encourages students to critically engage with the content within the context of modern life Key Features A new chapter dedicated to Digital and Social Media Marketing Fully updated pedagogy including Going International vignettes and End of Chapter questions Brand new examples and case studies from global and innovative companies including Red Bull Gillette and Audi Now includes Interactive activities Testbank questions and Quizzes available on Connect International Marketing is available with McGraw Hill s Connect the online learning platform that features resources to help faculty and institutions improve student outcomes and course delivery efficiency International Marketing continues to be an essential subject in any business or management degree Ghauri and Cateora s book now in its fifth edition provides a most up to date and authentic evolution of the subject George S Yip Emeritus Professor of Marketing and Strategy Imperial College Business School Professor Pervez Ghauri teaches International Business at Birmingham Business School He is Founding Editor for International Business Review IBR and Consulting Editor for Journal of International Business Studies JIBS Philip R Cateora is Professor Emeritus at the University of Colorado His teaching spanned a range of courses in marketing and international business from fundamentals through to doctoral level *Policy, Professionalization, Privatization, and Performance Assessment* Theresa J.
