Planet Earth is a scientific book written in a popular style for the average reader You have read about Peak Oil and Global  
Climate Warming and complained about 4 gallon gasoline but how really serious are these headlines and annoyances The  
author has worked his entire career on the science technology education administration and politics of these subjects and  
crystallizes this complex field into understandable elements providing simple solutions for humanity Does it make sense for  
the renewable energy budget of the Federal Government to be about 1 billion year when o Annual tax incentives and  
government programs for the oil industry are supposedly in the range between 38 billion and 115 billion although Lester

Brown says 210 billion in 2005 o Farm subsidies alone in 2004 cost taxpayers 16 2 billion o Our country spends 12 billion a month or 144 billion year on the Iraq and Afghanistan wars ostensibly to protect oil only to raise prices The author s long experience with the Greenhouse Effect has led him to believe that methane not carbon dioxide could well be the critical gas of concern for there is potential for global warming to cascade into what he terms the Venus Syndrome The closing chapter speculates on a hypothesis regarding mega tsunamis 100 meter waves from landslides While simple solutions are suggested the problem is the inability of our civilization to agree on a workable strategy which is further weakened by the lack of will on part of the general populace Thus the reader is urged to help make that crucial difference Instructions and examples are provided on how to attain Rainbow Vision to carry out this mission for a better Planet Earth The simplest solution is for everyone to join in on the effort

*Urban Revitalization* Carl Grodach, Renia Ehrenfeucht,2015-12-22 Following decades of neglect and decline many US cities have undergone a dramatic renaissance From New York to Nashville and Pittsburgh to Portland governments have implemented innovative redevelopment strategies to adapt to a globally integrated post industrial economy and cope with declining industries tax bases and populations However despite the prominence of new amenities in revitalized neighborhoods spectacular architectural icons and pedestrian friendly entertainment districts the urban comeback has been highly uneven Even thriving cities are defined by a bifurcated population of creative class professionals and a low wage low skilled workforce Many are home to diverse and thriving immigrant communities but also contain economically and socially segregated neighborhoods They have transformed high profile central city brownfields but many disadvantaged neighborhoods continue to grapple with abandoned and environmentally contaminated sites As urban cores boom inner ring suburban areas increasingly face mounting problems while other shrinking cities continue to wrestle with long term decline The Great Recession brought additional challenges to

planning and development professionals and community organizations alike as they work to maintain successes and respond to new problems. It is crucial that students of urban revitalization recognize these challenges, their impacts on different populations, and the implications for crafting effective and equitable revitalization policy. *Urban Revitalization: Remaking Cities in a Changing World* will be a guide in this learning process. This textbook will be the first to comprehensively and critically synthesize the successful approaches and pressing challenges involved in urban revitalization. The book is divided into five sections. In the introductory section, we set the stage by providing a conceptual framework to understand urban revitalization that links a political economy perspective with an appreciation of socio-cultural factors in explaining urban change. Stemming from this, we will explain the significance of revitalization and present a summary of the key debates, issues, and conflicts surrounding revitalization efforts. Section II will examine the historical causes for decline in central city and inner-ring suburban areas and shrinking cities and building from the conceptual framework, discuss theory useful to explain the factors that shape contemporary revitalization initiatives and outcomes. Section III will introduce students to the analytical techniques and key data sources for urban revitalization planning. Section IV will provide an in-depth critical discussion of contemporary urban revitalization policies, strategies, and projects. This section will offer a rich set of case studies that contextualize key themes and strategic areas across a range of contexts, including the urban core, central city neighborhoods, suburban areas, and shrinking cities. Lastly, Section V concludes by reflecting on the current state of urban revitalization planning and the emerging challenges the field must face in the future. *Urban Revitalization* will integrate academic and policy research with professional knowledge and techniques. Its key strength will be the combination of a critical examination of best practices and innovative approaches with an overview of the methods used to understand local situations and urban revitalization processes. A unique feature will be chapter-specific case studies of contemporary urban revitalization projects and questions geared toward generating classroom discussion around key issues. The book will be written in an accessible style and thoughtfully organized to provide graduate and upper-level undergraduate students with a comprehensive resource that will also serve as a reference guide for professionals.
