

ADJUSTING STITCH LENGTH

The stitch length dial controls the length of stitches. The numbers around the edge of the dial express stitch length in stitches per inch; the higher the number, the shorter the stitch. Generally, shorter stitches are best for lightweight fabric; longer stitches for heavy fabric. The **FINE** area is used for the adjustment of zig-zag satin stitching (see page 24).

Setting the Dial

- Turn dial so that stitch length desired is positioned under ▼ symbol.
- To shorten the stitch length, turn the dial clockwise to a higher number.
- To lengthen the stitch length, turn the dial counterclockwise to a lower number.

For reverse stitching, press the reverse-stitch push button (located in the center of the dial) in as far as it will go and hold in place (the button can be pushed in while the machine is sewing). Release pressure on the push button to return to forward stitching.
