Silence in English Language Pedagogy Dat Bao, 2023-02-09. Silence in language learning is commonly viewed negatively, with language teachers often struggling to interpret learner silence and identify whether it is part of communication, mental processing or low engagement. This book addresses silence in language pedagogy from a positive perspective, translating research into practice in order to inform teaching and to advocate greater use of positive silence in the classroom. The first half of the book examines the existing research into silence and the second half provides research-informed practical strategies and classroom tasks. It offers applicable principles for task design that utilises rich resources which include visual arts, mental representation, poetry, music and other innovative tools to allow both silence and speech to express their respective and interrelated roles in learning. Comprehensive yet accessible, it is essential reading for academic researchers and students in applied linguistics, TESOL and language teaching as well as for language teachers and educators.

The Use of Pop Songs in the EFL Classroom Ornerová Lenka, 2011-03-09 Inhaltsangabe

Introduction I have chosen the topic of using pop songs in the EFL classroom because I strongly believe that working with pop songs is a highly motivational device When I was a student at a lower and upper secondary school listening to songs in English classes was my favourite activity I have always wanted to be able to understand the lyrics of songs I listened to Later I realized that I have learned a lot from listening to pop songs and analyzing their lyrics Therefore in my diploma project I would like to prove that using pop songs is a highly motivational device in teaching English with instructional value and that students enjoy working with pop songs The theoretical part of this diploma project is based on relevant sources of background literature In the first two chapters the use of songs is described with regard to motivation and the Multiple Intelligences Theory The third and fourth chapter deal with the reasons for using songs and their classification In the last two chapters of the theoretical part pedagogical principles of using pop songs in class as well as the pros and cons of teaching through pop songs are presented The practical part is based on the findings of three surveys I have conducted in the field of using songs in the EFL classroom In the first part of the research I present an analysis of questionnaires which I distributed among English teachers at lower and upper secondary schools and grammar schools In the second part of the research I describe students attitudes to pop song based lessons which I taught during my teaching practice at grammar schools In the third part of the research I analyze the types of songs presented in commonly used textbooks at lower and upper secondary schools In addition I present a self developed teaching material containing a list of pop songs suitable for the EFL classroom In the last part of the practical part I answer the research questions and provide some implications for my own teaching
