S1 Well, I suppose the most obvious advantage of online shopping is that goods are cheaper than in the shops. In fact you get some really good deals on the Internet.

S2 True, but you have to admit that you don't really know what you're getting when you shop online, until it arrives.

S1 But surely you can almost always see a photo of what you're buying on a website.

Bonnevot, S. Kaliaguine, 1995-09-08 Formerly the catalytic use of zeolites was exclusive to the field of acid catalysis Nowadays zeolites also find applications as catalysts in a wide array of chemical reactions such as base catalyzed reactions Redox reactions and catalytic reactions on transition metals and their complexes in confined environments The concepts of Brønsted or Lewis acid base pairs are adequately illustrated in the literature and well understood in terms of structural and electronic properties of zeolites By contrast properties of chemically modified silicates aluminosilicates and aluminophosphates have not yet been fully explored The list of oxydo reduction reactions performed in the presence of these new materials is growing as demonstrated by the selective catalytic reduction of nitrogen oxides or the numerous oxidations employing hydrogen peroxide Much effort is currently being made to get a better insight into the nature of the sites involved The zeolite lattice may also be used as a host for encapsulated complexes or metallic clusters allowing the control of nuclearity of these active species and the steric constraints imposed on the reactants Molecular sieve and shape selectivity effects have also constituted fascinating aspects of zeolite properties Recent developments leading to increasingly large pore sizes with VPI 5 cloverite and more recently mesoporous molecular sieves have broadened the spectrum of these applications Indeed larger and larger reactant and product molecules can be accommodated in these lattices These new adsorbant adsorbate systems create additional needs for experimental data and theoretical descriptions of transport properties in particular of mono and multi components diffusion coefficients in the zeolite pore lattice All these themes representing the forefront and current

trends in zeolite research were discussed in the submitted papers to the symposium and are widely represented in the selected papers contained in this volume A feature common to most of these contributions is the combined use of a variety of analytical techniques Some of these techniques are at the frontier of the latest analytical developments such as multiple scattering EXAFS and bidimensional MAS NMR      *Business Benchmark Pre-intermediate to Intermediate BULATS Student's Book* Norman Whitby, 2013-01-24 La 4e de couv indique Business benchmark second edition is the official Cambridge English preparation course for BULATS A pacy topic based course with comprehensive coverage of language and skills for business it motivates and engages both professionals and students preparing for working life      **Key Maths GCSE** ,2003 Developed for the CCEA Specification this Teacher File contains detailed support and guidance on advanced planning points of emphasis key words notes for the non specialist useful supplementary ideas and homework sheets
