Proceeding of the International Conference on Computer Networks, Big Data and IoT (ICCBI - 2018) A.

Pasumpon Pandian,Tomonobu Senjyu,Syed Mohammed Shamsul Islam,Haoxiang Wang,2019-07-31 This book presents the proceedings of the International Conference on Computer Networks Big Data and IoT ICCBI 2018 held on December 19 20 2018 in Madurai India In recent years advances in information and communication technologies ICT have collectively aimed to streamline the evolution of internet applications In this context increasing the ubiquity of emerging internet applications

with an enhanced capability to communicate in a distributed environment has become a major need for existing networking models and applications. To achieve this Internet of Things (IoT) models have been developed to facilitate a smart interconnection and information exchange among modern objects which plays an essential role in every aspect of our lives. Due to their pervasive nature, computer networks and IoT can easily connect and engage effectively with their network users. This vast network continuously generates data from heterogeneous devices, creating a need to utilize big data which provides new and unprecedented opportunities to process these huge volumes of data. This International Conference on Computer Networks, Big Data, and Internet of Things (ICCBI) brings together state-of-the-art research work which briefly describes advanced IoT applications in the era of big data. As such, it offers valuable insights for researchers and scientists involved in developing next-generation big data-driven IoT applications to address the real-world challenges in building a smartly connected environment.

Managing Education for Business and Commerce in a Globalized World, WAVE PROPAGATION AND ANTENNA ENGINEERING KUMAR, SANJAY, SHUKLA, SAURABH, 2015-12-14. The book is primarily designed to cater to the needs of undergraduate and postgraduate students of Electronics and Communication Engineering and allied branches. It also caters to the fundamental requirements of professionals working on design and development of antenna and wave propagation-related equipment either in research laboratories or industries or academic institutions elsewhere. The book has been written with intent to grasp the basic understanding of theoretical as well as practical aspects of electromagnetic wave propagation and antenna engineering. The text has been aptly scripted considering the requirements of average students who can easily grasp and comprehend the basics of wave propagation and radiation mechanism of varieties of antennas coupled with their critical functionalities, utilities, advantages, disadvantages without any external assistance of teachers or other reference books. The book broaches very well on practical methods of parametric measurements of antenna with right measuring test equipment and associated tools. The last chapter of the book is dedicated to advance technology adopted in design and development of modern antenna. Key features: A fairly large number of well-labelled diagrams to provide practical understanding of the concepts. The placement of numericals at appropriate places develops confidence among readers and enthruses them further to read in depth to crack any regular or competitive examinations. Chapter summary highlights important points for quick recap and revision before examination. Well-crafted multiple choice questions with answers at the end of each chapter to stimulate thought process and prepare better for viva voce and competitive examinations. Appropriate number of unsolved numerical problems with answers to improve problem-solving skill of students.
