

Solving Inequalities

$$3x + 9 > 18$$

Common Core Standards

Grade 8

- 8.EE.5** Understand solving an equation or inequality as a process of reasoning: a sequence of steps leads from a given equation or inequality to a simpler one, which reveals whether the equation or inequality is true. Use substitution to determine whether a given number is a solution to an equation or inequality.
- 8.EE.6** Use variables to represent numbers and write expressions when solving a real-world or mathematical problem; understand that a variable can represent an unknown number, or, depending on the purpose at hand, any number in a specified set.
- 8.EE.8** Write an inequality of the form $x > c$ or $x < c$ to represent a condition or constraint in a real-world or mathematical problem. Recognize that inequalities of the form $x > c$ or $x < c$ have infinitely many solutions; represent solutions of such inequalities on number line diagrams.

Grade 7

- 7.EE.4** Use variables to represent quantities in a real-world or mathematical problem, and construct simple equations and inequalities to solve problems by reasoning about the quantities.

High School – Algebra

- A-REI.3** Solve linear equations and inequalities in one variable, including equations with coefficients represented by letters.
