Computational Intelligent Data Analysis for Sustainable Development Ting Yu, Nitesh Chawla, Simeon Simoff, 2016-04-19 Going beyond performing simple analyses researchers involved in the highly dynamic field of computational intelligent data analysis design algorithms that solve increasingly complex data problems in changing environments including economic environmental and social data Computational Intelligent Data Analysis for Sustainable Development presents novel methodologies for automatically processing these types of data to support rational decision making for sustainable development Through numerous case studies and applications it illustrates important data analysis methods including mathematical optimization machine learning signal processing and temporal and spatial analysis for quantifying and describing sustainable development problems With a focus on integrated sustainability analysis the book presents a large scale quadratic programming algorithm to expand high resolution input output tables from the national scale to the multinational scale to measure the carbon footprint of the entire trade supply chain It also quantifies the error or dispersion between different reclassification and aggregation schemas revealing that aggregation errors have a high concentration over specific regions and sectors The book summarizes the latest contributions of the data analysis community to climate change research A profuse amount of climate data of various types is available providing a rich and fertile playground for future data mining and machine learning research The book also pays special attention to several critical challenges in the science of

climate extremes that are not handled by the current generation of climate models It discusses potential conceptual and methodological directions to build a close integration between physical understanding or physics based modeling and data driven insights The book then covers the conservation of species and ecologically valuable land A case study on the Pennsylvania Dirt and Gravel Roads Program demonstrates that multiple objective linear programming is a more versatile and efficient approach than the widely used benefit targeting selection process Moving on to renewable energy and the need for smart grids the book explores how the ongoing transformation to a sustainable energy system of renewable sources leads to a paradigm shift from demand driven generation to generation driven demand It shows how to maximize renewable energy as electricity by building a supergrid or mixing renewable sources with demand management and storage It also presents intelligent data analysis for real time detection of disruptive events from power system frequency data collected using an existing Internet based frequency monitoring network as well as evaluates a set of computationally intelligent techniques for long term wind resource assessment In addition the book gives an example of how temporal and spatial data analysis tools are used to gather knowledge about behavioral data and address important social problems such as criminal offenses It also applies constraint logic programming to a planning problem the environmental and social impact assessment of the regional energy plan of the Emilia Romagna region of Italy Sustainable development problems such as global warming resource shortages global species loss and pollution push researchers to create powerful data analysis approaches that analysts can then use to gain insight into these issues to support rational decision making This volume shows both the data analysis and sustainable development communities how to use intelligent data analysis tools to address practical problems and encourages researchers to develop better methods

Climate Variability and Change in the Rift Valley and Blue Nile Basin, Ethiopia Abate Mekuriaw Bizuneh, 2013 This study deals with three interrelated problems First it pursues the quest for local knowledge to understand climate variability and change at local levels Due to controversies uncertainties skepticism and embedded economic and political interests in the climate change discourse effective world collective action is more likely to delay for quite some time to come Moreover as climate change discourse remains very weak at engaging local knowledge policies that emanate from the discourse might be less responsive to local climate problems both in terms of policy ingredients and time frame So highlighting the paramount importance of local knowledge this study documents and critically analyzes this knowledge system among subsistence farmers in Ethiopia Secondly it analyzes the economic impacts of climate variability and change and adaptation through quantitative methods with a special focus on crop production Finally it analyzes the factors that influence adaptive behavior In so doing it challenges the traditional approach of adaptation research and brings in a conceptual framework borrowed from psychosocial theory and empirically tests the approach in explaining adaptive behavior of farmers

Solutions Manual for Econometrics Badi H. Baltagi, 2013-03-14 This manual provides solutions to selected exercises from each chapter of Econometrics by Badi H Baltagi starting with Chapter 2 For the empirical exercises some SAS programs are provided to replicate the results Most graphs are plotted using EViews Some of the problems and solutions are obtained from Econometric Theory ET and these are reprinted with the permission of Cambridge University Press I would like to thank Peter C B Phillips and the editors of the Problems and Solutions section Alberto Holly and Juan Dolado for this useful service to the econometrics profession I would also like to thank my colleague James M Griffin for providing many empirical

problems and data sets I have also used three empirical data sets from Lott and Ray 1992 The reader is encouraged to apply these econometric techniques to their own data sets and to replicate the results of published articles Some journals authors provide data sets upon request or are readily available on the web Other empirical examples are given in Lott and Ray 1992 and Berndt 1991 Finally I would like to thank my students Wei Wen Xiong Ming Jang Weng and Kiseok Nam who solved several of these exercises Please report any errors typos or suggestions to Badi H Baltagi Department of Economics Texas A M University College Station Texas 77843 4228 Telephone 409 845 7380 Fax 409 847 8757 or send EMAIL to Badi.econ@tamu.edu Table of Contents Preface V Chapter 2 A Review of Some Basic Statistical Concepts Chapter 3 Simple Linear Regression
