Electronic Batch Recording Solutions Monika Futschik, 2017-10-11 Monika Futschik introduces an evaluation model that allows a holistic assessment of the advantages and disadvantages of electronic batch recording solutions versus traditional paper batch ticket solutions. In comparison to former studies, this newly developed evaluation model considers the change management efforts and the financial investments required for system deployment. The model proves the overall performance value through the implementation of electronic batch recording solutions and supports decision makers in finding the most effective solution. The development and effectiveness of this model is based on various surveys, expert interviews, a Delphi study, as well as a case study with a real life pharmaceutical company. The outcome of her research can be easily applied to other industries as well.

Agile Strategies for the 21st Century Herbert Nold, 2021-11-22 Designing agile organizations fit for a dynamic, volatile, uncertain, complex, and ambiguous (VUCA) world has become a necessary skill for successful 21st century leaders. This book provides a summary of many classical strategic management techniques before introducing the reader to emergent concepts that are more in tune with the VUCA environment. It explains how the culture defines an environment that either enables or inhibits the creation of new knowledge, which translates into innovation and fast, effective decision making.
