Transcript

The photos are connected with the  
topic of school. Both photos show  
students in class.

In the first photo I imagine that  
they're about 11 years old.  
It looks like a serious lesson  
and judging by the students'  
expressions, I'd say that they are  
enjoying their lesson. They look  
interested and it looks as though  
they are working hard. Most of  
them are looking at the experiment  
and smiling together. They are  
all wearing uniforms – it's quite an  
old-fashioned looking uniform, so  
I would guess that it's a private  
school, but it could be a state

why mathematics exists in the way it does The narrative does not evolve along traditional subject lines each topic develops from its simplest intuitive starting point complexity develops naturally via questions and extensions Throughout the book includes levels of explanation discussion and passion rarely seen in traditional textbooks The choice of material is similarly rich ranging from number theory and the nature of mathematical thought to quantum mechanics and the history of mathematics It rounds off with a selection of thought provoking and stimulating exercises for the reader
