GAO (GAO), 2013 **Export-Import Bank: Additional Analysis and Information Could Better Inform Congress on Exposure, Risk, and Resources** Lawrence L. Evans, Jr., Joshua Akery, Anna Chung, Juan Gobel, Michael Simon, 2013-05-30 While the Export Import Bank Ex Im Business Plan reported that Ex Im s exposure limits were appropriate the forecasting process used to reach this conclusion has weaknesses Congress increased the Ex Im exposure limit the limit on Ex Im s total aggregate outstanding amount of financing to 120 billion in 2012 with provisions for additional increases to 130 billion in 2013 and 140 billion in 2014 Although Ex Im s forecast model is sensitive to key assumptions GAO found that Ex Im did not reassess these assumptions to reflect changing conditions or conduct sensitivity analyses to assess and report the range of potential outcomes GAO used historical data in lieu of these assumptions and found that Ex Im s forecast of exposure could be higher than the limit set by Congress for 2014 GAO s cost guidance calls for agencies assumptions and forecasts to be supported by historical data and experience and a sensitivity analysis which can assess the effect of changes in assumptions Because Ex Im has not taken these steps the reliability of its forecasts is diminished This is of particular concern because Ex Im projects that its outstanding financing in the future will be closer to its exposure limit than it has been historically Consequently any forecast errors could result in the bank having to take actions such as delaying financing for creditworthy projects to avoid exceeding its limit The Business Plan provided limited analysis of Ex Im s risk of loss First Ex Im did not provide some forecast data because of pending Office of Management and Budget OMB approval of key analyses For example Ex Im did not include conclusions on Ex Im s overall risk of loss and risk by industry Second Ex Im included only limited analysis to support its conclusions that changes in its portfolio including subportfolios of transactions supporting congressional mandates for small business sub Saharan Africa and renewable energy would not affect its risk of loss In addition Ex Im has not routinely analyzed or reported the risk rating and default rate of subportfolios that respond to these mandates although their performance may differ from the overall portfolio OMB and banking regulator guidance call for entities including federal agencies to be able to provide comprehensive information by subportfolio product and other financial performance metrics By not routinely analyzing and reporting financial performance for mandated transactions Ex Im decreases its ability to evaluate such performance at the subportfolio level and inform Congress of related risks The Business Plan provided limited analysis of the adequacy of Ex Im s resources and ability to meet congressional mandates From 2008 through 2012 Ex Im s administrative resources remained relatively flat as its portfolio grew Ex Im does not expect to meet its small business or renewable energy mandate targets in 2013 or 2014 These mandate targets are fixed to a percentage of the dollar value of Ex Im s total authorizations Although Ex Im has dedicated resources to support these mandates as Ex Im authorizations have grown the growth in mandate targets has outpaced Ex Im s increasing support Ex Im projects that the targets will continue to outpace its growth in support through 2014 Mandate transactions also are resource

intensive and Ex Im s ability to expand its renewable energy portfolio may be constrained by the size of the overall market Communicating the effect of percentage based targets on Ex Im s resources and ability to achieve its goals to external stakeholders such as Congress is consistent with federal internal control standards Ex Im helps U S firms export goods and services by providing a range of financial products Following the 2007 2009 financial crisis increased demand resulted in rapid increases in Ex Im s portfolio and exposure The Export Import Bank Reauthorization Act of 2012 reauthorized Ex Im through fiscal year 2014 and as a condition of raising Ex Im s exposure limit in 2013 required Ex Im to prepare a report with a business plan and analyses of key operational elements The act also directed GAO to analyze the Business Plan This report discusses the extent to which Ex Im s Business Plan and analyses 1 justify bank exposure limits 2 evaluate the risk of loss associated with the increased exposure limit changing composition of exposure and compliance with congressional mandates and 3 analyze the adequacy of Ex Im resources to manage authorizations and comply with congressional mandates GAO reviewed Ex Im s Business Plan analyses and other reports and interviewed Ex Im officials What GAO Recommends Ex Im should 1 adjust its forecasting model based on previous experience 2 assess and report the sensitivity of the exposure forecast model to key assumptions and estimates 3 routinely report the financial performance of subportfolios supporting congressional mandates and 4 provide Congress with additional information on the resources associated with meeting mandated targets Ex Im concurred with our recommendations
