This volume offers an update of the clinical signs diagnostic criteria including molecular diagnosis and targeted therapies for a particular type of genodermatosis providing a handy and unique tool for early diagnosis In recent years our understanding of genodermatosis and neurocutaneous syndromes has increased but although Type 1 Neurofibromatosis NF1 is the most

common neuroectodermal disorder and involves a large number of patients and medical disciplines this syndrome remains underestimated often misdiagnosed thus leading to inaccurate treatment The literature on the molecular and pathogenetic aspects is ample but current clinical approaches classification diagnostic criteria and treatment protocols are outdated creating difficulties in early diagnosis and treatment As such a chapter is devoted renewing current diagnostic criteria it includes clinical and molecular data to offer a sound updated discussion basis for a consensus conference NF1 is a time dependent disorder meaning that the onset of clinical signs are closely linked to patient age and the book discusses this particularly neglected aspect extensively as well as the latest molecular diagnosis techniques which are highly sensitive have not been included in the diagnostic criteria It also explains the role of the RAS MAPK pathway and genotype phenotype correlations In addition it explores new concepts concerning the pathogenesis of neurofibromas and other hamarthomas and their relevance for a modern therapeutical approach with targeted molecular drugs as well as newly discovered aspects of NF1 in all internal organs together with their diagnostic counterparts A chapter on mosaic neurofibromatosis is also included There is a particular focus on differential diagnosis i e other diseases with caf au lait macules and the recently described Legius syndrome will be presented directly by Prof Eric Legius All chapters are easy to understand up to date comprehensive and concise tools and are intended for a wide range of professionals involved with genetic disorders of the skin and neurocutaneous diseases dermatologists pediatricians neurologists oncologists and general practitioners
