The Johns Hopkins University School of Medicine Curriculum for the Twenty-first Century Catherine D. De Angelis, 2000-03-27 Our basic philosophy of medical education must be directed not toward creating a neurosurgeon a family practitioner a cardiologist or a general pediatrician but toward creating an undifferentiated stem cell physician who is so well prepared that he or she is fully capable of taking any career path after medical school Every indication is that our goal is being met The new curriculum is preparing students for the demands and responsibilities of a new era of medicine science and medical arts from the Foreword by Michael M E Johns MD The curriculum taught in many U S medical schools today has been altered little since 1910 Now spurred in part by the recent sweeping changes in health care delivery medical schools are re evaluating their curricula The goal is to develop a program of medical education that not only reflects the latest scientific advances but also prepares physicians in the fields
