boundaries of standard language and exploit the potential of their multilingual repertoires online **Diversity in African languages** Doris L. Payne, Sara Pacchiarotti, Mokaya Bosire, 2016-12-31 Diversity in African Languages contains a selection of revised papers from the 46th Annual Conference on African Linguistics held at the University of Oregon. Most chapters focus on single languages addressing diverse aspects of their phonology, morphology, semantics, syntax, information structure, or historical development. These chapters represent nine different genera: Mande, Gur, Kwa, Edoid, Bantu, Nilotic, Gumuzic, Cushitic, and Omotic. Other chapters investigate a mix of languages and families, moving from typological issues to sociolinguistic and inter-ethnic factors that affect language and accent switching. Some chapters are primarily descriptive, while others push forward the theoretical understanding of tone, semantic problems, discourse-related structures, and other linguistic systems. The papers on Bantu languages reflect something of the internal richness and continued fascination of the family for linguists, as well as maturation of research on the family. The distribution of other papers highlights the need for intensified research into all the language families of Africa, including basic documentation in order to comprehend linguistic diversities and convergences across the continent. In this regard, the chapter on Daatsi in Gumuzic stands out as the first ever published article on this hitherto unknown and endangered language found in the Ethiopian-Sudanese borderlands. **Thinking**

Sociolinguistically Paul McPherron, Trudy Smoke, 2018-12-06 This is a practical guide to planning, conducting, and presenting a sociolinguistic research project. Written in an accessible and engaging style, the book begins with a brief review of what sociolinguists study and how they study it, before guiding students step by step through the research process. It presents a range of qualitative and quantitative data collection and analysis methods, including surveys, interviews, and corpora, supported by examples from both published researchers and student projects. Drawing on the experiences of their own students, the authors provide supportive guidance on common areas of difficulty, such as framing questions, selecting participants, and interpreting data. The final part shows you how to organise and write up your findings. Chapters are further enriched with hands-on activities and discussion questions. This is an essential companion for budding sociolinguistic researchers with a desire to understand the linguistic landscapes around them and communicate their findings to others.
