Advanced System Modelling and Simulation with Block Diagram Languages Nicholas M. Karayanakis, 1995-06-09
Advanced System Modelling and Simulation with Block Diagram Languages explores and describes the use of block languages in dynamic modelling and simulation. The application of block diagrams to dynamic modelling is reviewed not only in terms of known components and systems but also in terms of the development of new systems. Methods by which block diagrams clarify the dynamic essence of systems and their components are emphasized throughout the book and sufficient introductory material is included to elucidate the book's advanced material. Widely used continuous dynamic system simulation CDSS languages are analyzed and their technical features are discussed. This self-contained resource includes a review section on block diagram algebra and applied transfer functions, both of which are important mathematical subjects relevant to the understanding of continuous dynamic system simulation.

Artificial Intelligence-Based Design of Reinforced Concrete Structures Won-Kee Hong, 2023-04-29
Artificial Intelligence Based Design of Reinforced Concrete Structures: Artificial Neural Networks for Engineering Applications is an essential reference resource for readers who want to learn how to perform artificial intelligence based structural design. The book describes in detail the main concepts of ANNs and their application and use in civil and architectural engineering. It shows how neural networks can be established and implemented depending on the nature of a broad range of diverse engineering problems. The design examples include both civil and architectural engineering solutions for both structural engineering and concrete structures. Those who have not had the opportunity to study or implement neural networks before will find this book very easy to follow. It covers the basic network theory and how to formulate and apply neural networks to real world problems. Plenty of examples based on real engineering problems and solutions are included to help readers better understand important concepts. Helps civil engineers understand the fundamentals of AI and ANNs and how to apply them in simple reinforced concrete design cases. Contains practical case study examples on the application of AI technology in structural engineering. Teaches readers how to apply ANNs as solutions for a broad range of engineering problems. Includes AI based software MATLAB which will enable readers to verify AI based examples.

The CellaVision Story Per Simonsson, 2019-04-07
Decades of hard work, failures and a constant shortage of funds lined the Lund-based CellaVision's path to becoming what it is today, a world leader in medical technology. Founder Christer F. Hraeus had an idea to replace the microscope in the diagnosis of leukemia and other serious diseases. Yvonne M. Rtensson built a company. Lars Gatenbeck had the money and dared to put it on the line. The result was CellaVision. In this personally recounted company history, author and doctor Per Simonsson tells the story of CellaVision. It's an engaging story for those who are interested in how an innovation company begins, develops and finally succeeds. This is also a book for anyone who wants to learn more about productive collaboration and how creative environments are formed.
