Ernesto Bustamante Zuleta, 2007 **Eating Disorders** Ignacio Jáuregui Lobera, 2017-02-01 Despite the relevance of eating disorders in the past years the pure core of these mental disorders remains unknown In this regard it is not a surprise that the biopsychosocial model is the best way to go forward in order to understand and to improve the different approaches biological mainly neurobiological psychological and social in managing these disorders Eating disorders are frequent pathologies many times severe and often devastating for patients and their families Biological psychological and social factors are always involved in these disorders and knowledge about the influence of these factors helps us to better understand eating disorders This book includes different studies about main topics of eating disorders and is useful for psychologists doctors and others interested in this disorder **Philosophy of Psychology: Causality and Psychological Subject** Wenceslao J. Gonzalez, 2018-06-11 Contemporary philosophy of science analyzes psychology as a science with special features because this discipline includes some specific philosophical problems descriptive and normative structural

and dynamic Some of these are particularly relevant both theoretically casual explanation and practically the configuration of the psychological subject and its relations with psychiatry Two central aspects in this book are the role of causality especially conceived as intervention or manipulation and the characterization of the psychological subject This requires a clarification of scientific explanations in terms of causality in psychology because characterizations of causality are quite different in epistemological and ontological terms One of the most influential views is James Woodward s approach to causality as intervention which entails an analysis of its characteristics new elements and limits This means taking into account the structural and dynamic aspects included in causal cognition and psychological explanations Psychology seen as special science also requires us to consider the scientific status of psychology and the psychological subject which leads to limits of naturalism in psychology

PRÁCTICAS DE ATENCIÓN TEMPRANA CENTRADAS EN LA FAMILIA Y EN ENTORNOS NATURALES RODRÍGUEZ GARCÍA Lidia, 2019-05-06 En la presente década el ámbito de la Atención Temprana está viviendo importantes procesos de transformación que podemos anclar en tres protagonistas Por una parte los científicos que investigan sobre un paradigma que centra sus esfuerzos en contribuir a mejorar la calidad de vida de las familias Por otra parte las familias que demandan nuevas formas de entender sus necesidades y sus apoyos Por último los profesionales que quieren llegar a transformar sus prácticas pero encuentran ciertos

obstáculos para acceder a la evidencia científica clave que sustenta el cambio que pretenden. Se quiere que este libro sirva de puente entre el mundo científico, el ámbito profesional y las familias. Se ha invitado a participar en esta obra a las principales figuras académicas en la disciplina. El lector encontrará los últimos trabajos de autores pioneros tanto internacionales como nacionales con amplio recorrido histórico en prácticas centradas en la familia y en entornos naturales que en su momento impulsaron los procesos de transformación en sus respectivos países y que hoy escriben para estudiantes y profesionales con el propósito de guiarles en su proceso. Indudablemente también los profesionales han sido invitados a participar en la obra con el fin de que puedan andamiar el proceso de construcción de otros profesionales. Desde nuestra mirada era necesario contribuir a estos procesos de transformación con un libro pensado, esperado y necesario, publicado en castellano dirigido a estudiantes académicos y profesionales. Ojalá encuentren aquí el apoyo científico, emocional y profesional para que si lo deciden puedan transformar sus propias prácticas hacia prácticas respetuosas centradas en la familia y en el entorno natural.

Dificuldade de aprendizagem Vitor da Fonseca, O livro explora as temáticas e os tópicos mais relevantes da teoria e da prática das Dificuldades de Aprendizagem (DA) que ocorrem principalmente na criança e no adolescente. Nele são apresentados os fundamentos históricos e epistemológicos desde os pioneiros até os investigadores mais credenciados da atualidade ao mesmo tempo que abordada a análise contextual e sociocultural da aprendizagem sem esquecer a evidência dos dados da genética e da neuropsicologia e a importância dos estudos da sua etiologia, epidemiologia, definição e taxonomia. Trata-se de uma abordagem inovadora que apresenta novos capítulos em relação ao anterior dos quais se destacam as bases neuropsicopedagógicas da aprendizagem humana, não verbal, verbal e quantitativa e um estudo mais aprofundado da dislexia, uma espécie de mito da classe média que tem atravessado todo o sistema escolar e gerado uma inesperada confusão em pais, professores, médicos, psicólogos, psicopedagogos, reeducadores, terapeutas e demais profissionais. A questão das DA apresentada não só em uma perspectiva de dissonância e disrupto do processo ensino-aprendizagem, mas também em uma reflexão crítica sobre o baixo rendimento escolar e o insucesso escolar de muitas crianças e jovens que apresentam diferenças na aprendizagem escolar, sem todavia se ter em consideração a sua complexidade desenvolvimental e a sua neurodiversidade e sem se ter avançado suficientemente na sua pesquisa quer em termos de instrumentos de diagnóstico dinâmico quer em termos de intervenção reeducativa, terapêutica diferenciada e individualizada. O livro foi escrito com o intuito de abordar todas estas questões de forma compreensiva e essencialmente dirigido a todos os profissionais e estudantes interessados na natureza multidimensional das DA. Abarca ainda alguns modelos causais e instrumentos de identificação precoce e sugestões de algumas estratégias de intervenção clínica na leitura, na fala, na psicomotricidade, na escrita, na matemática e nas competências cognitivas básicas de estudo e de processamento de informação e apropriação do conhecimento. O campo das DA que apresentado encontra-se particularmente focado nas dificuldades de aprendizagem específicas, a saber, da dislexia, dedica também alguns textos caracterizando a neuropsicopedagógica da disfasia, da disnomia, da disartria, da dispraxia, da

disgrafia da disortografia e da dismatemática apontando alguns dos sinais de preocupação e de risco que a criança pode evidenciar desde a Educação Infantil até o Ensino Fundamental. Em síntese a finalidade do livro tem a intenção de identificar, caracterizar, apoiar e ajudar crianças e jovens que lutam na escola por aprender mais e melhor pois não podemos esquecer que neste contexto que se joga o seu futuro como cidadão.

Introducción a la evaluación clínica neuropsicológica del adulto Salazar Montes, Ana María, Canal, José Santiago, Amarillo, Johana, Cabrera, Edna, Cardoza, Jenifer, Guzmán, Jenny, 2020-07-07 El estudio de los procesos cognoscitivos se ha convertido en un reto de profundización dada su injerencia en ámbitos clínicos patológicos de la enfermedad mental y el daño cerebral. Muchos textos académicos han descrito los procesos de evaluación neuropsicológica sin embargo pocos están dirigidos a la formación básica del quehacer del neuropsicólogo. La presente publicación apunta en esa dirección. Cada capítulo aborda una función específica: el proceso de evaluación neuropsicológica, la entrevista clínica y el estudio de funciones cognoscitivas como la memoria, el lenguaje, la percepción, la atención, las funciones ejecutivas, su alteración y evaluación. Se trata de una obra dirigida de forma específica a estudiantes y profesionales que quieran profundizar en el campo de la neuropsicología clínica del adulto y de manera más general de una herramienta de apoyo y consulta para profesionales del área de la salud psicológica y neuropsicológica.
