The Ethics of Total Confinement Bruce A. Arrigo, Heather Y. Bersot, Brian G. Sellers, 2011-06-29 In three parts this volume in the AP LS series explores the phenomena of captivity and risk management guided and informed by the theory method and policy of psychological jurisprudence The authors present a controversial thesis that demonstrates how the forces of captivity and risk management are sustained by several interdependent conditions of control These conditions impose barriers to justice and set limits on citizenship for one and all Situated at the nexus of political social theory mental health law and jurisprudential ethics the book examines and critiques constructs such as offenders and victims self and society therapeutic and restorative health harm and community So too are three total confinement case law data sets on which this analysis is based The volume stands alone in its efforts to systematically diagnose the moral reasoning lodged within prevailing judicial opinions that sustain captivity and risk management practices impacting 1 the rights of juveniles found competent to stand criminal trial the mentally ill placed in long term disciplinary isolation and sex offenders subjected to civil detention and community re entry monitoring 2 the often unmet needs of victims and 3 the demands of an ordered society Carefully balancing

sophisticated insights with concrete and cutting edge applications the book concludes with a series of provocative yet practical recommendations for future research and meaningful reform within institutional practice programming and policy

The Ethics of Total Confinement is a thought provoking and timely must read for anyone interested in the ethical and legal issues regarding madness citizenship and social justice It has become clear that there is no criminological exit from embrace of degrading punishments and practices to which our increasingly distorted risk perception commits us Instead the path forward must run through a return to the ethical and psychological roots of security and justice

The Ethics of Total Confinement is a quantum step forward in defining and advancing that path Jonathan Simon Adrian A Kragen Professor of Law Jurisprudence and Social Policy Program UC Berkeley School of Law This book boldly calls for a total transformation in the way the law deals with people who are confined because of their perceived depravity or dangerousness It focuses on three outcast groups juveniles tried as adults people with mental illness subjected to hospitalization and sex offenders committed as dangerous and based on an innovative analysis of the relevant caselaw and empirics shows why current practices not only visit substantial harm on these people but also brutalize those who deprive them of liberty and damage the rest of us by feeding our basest most uninformed fears Relying on Aristotelian philosophy therapeutic and restorative principles and commonsense justice the book persuasively argues that we must reorient the training and thinking of all major players in the system if our goal is to promote the maximum amount of human flourishing

Christopher Slobogin Milton Underwood Professor of Law Vanderbilt University Law School The Ethics of Total Confinement A Critique of Madness Citizenship and Social Justice deepens our understanding of how our legal system justifies its treatment of those it confines By bridging gaps among relevant disciplines the book clarifies to an interdisciplinary audience just how inadequate those justifications turn out to be when measured by psychological ethical or justice based standards The book s provocative conclusions and recommendations offer much food for thought and suggest potential directions for action

Dennis Fox Emeritus Associate Professor of Legal Studies and Psychology University of Illinois at Springfield The Ethics of Total Confinement shows how captivity diminishes the keepers and the kept It is a book that synthesises in creative new ways reformist visions of justice virtue and the cultivation of habits of character This is profound work that opens new paths to dignity healing and social justice

John Braithwaite Australian Research Council Federation Fellow Australian National University The Ethics of Total Confinement offers a useful and wide ranging perspective grounded in psychological jurisprudence With its emphasis on the harm done to those most vulnerable to extremes of risk management this volume makes a welcome addition to the literature on confinement

Lorna Rhodes Professor Department of Anthropology University of Washington The provocative thesis of this book develops psychological jurisprudence to conceptualize the ethics of existing total confinement practices aspiring to greater justice and human flourishing for all A timely intervention of this kind is most welcome

George Pavlich Associate Vice President Research Professor of Law and Sociology University of Alberta

Philosophical Perspectives on Moral Certainty Cecilie Eriksen, Julia Hermann, Neil O'Hara, Nigel

Pleasants, 2022-12-30 Moral certainty refers to those aspects of morality moral acting feeling and thinking that are beyond doubt explanation and justification The essays in this book explore the concept of moral certainty and its application and usefulness in contemporary moral debates The notion of moral certainty which is inspired by the philosophy of Ludwig Wittgenstein is emerging as a key reference point in contemporary moral philosophy An investigation into the implications of moral certainty is called for given that so many discussions in moral philosophy concern the possibility of justifying our moral beliefs The concept of moral certainty also feeds directly into the emerging field of hinge epistemology The chapters in this volume tackle the following issues meta questions around whether and how we can make sense of the concept of moral certainty the role of moral certainty in contemporary debates on gender racism bias and historically unjust practices ways in which radical change in society engendered by new technologies might affect moral certainties and the role of the notion of moral certainty in the debates on free will and moral responsibility Philosophical Perspectives on Moral Certainty will appeal to researchers and advanced students working on ethics and moral philosophy epistemology philosophy of technology and Wittgenstein

Ecological Ethics Patrick Curry, 2011-07-12 In this thoroughly revised and updated second edition of the highly successful Ecological Ethics Patrick Curry shows that a new and truly ecological ethic is both possible and urgently needed With this distinctive proposition in mind Curry introduces and discusses all the major concepts needed to understand the full range of ecological ethics He discusses light green or anthropocentric ethics with the examples of stewardship lifeboat ethics and social ecology the mid green or intermediate ethics of animal liberation rights and dark or deep green ecocentric ethics Particular attention is given to the Land Ethic the Gaia Hypothesis and Deep Ecology and its offshoots Deep Green Theory Left Biocentrism and the Earth Manifesto Ecofeminism is also considered and attention is paid to the close relationship between ecocentrism and virtue ethics Other chapters discuss green ethics as post secular moral pluralism and pragmatism green citizenship and human population in the light of ecological ethics In this new edition all these have been updated and joined by discussions of climate change sustainable economies education and food from an ecocentric perspective This comprehensive and wide ranging textbook offers a radical but critical introduction to the subject which puts ecocentrism and the critique of anthropocentrism back at the top of the ethical intellectual and political agenda It will be of great interest to students and activists and to a wider public

International Handbook of Education for Spirituality, Care and Wellbeing Marian de Souza, LESLIE J. FRANCIS, James O'Higgins-Norman, Daniel G. Scott, 2009-10-13 Acknowledging and understanding spiritual formation is vital in contemporary education This book explores the dynamic relationship between education and wellbeing It examines the theory underpinning the practice of education in different societies where spirituality and care are believed to be at the heart of all educational experiences The book recognizes that regardless of the context or type of educational experience education is a caring activity in which the development of the whole person body

mind and spirit is a central aim for teachers and educators in both formal and informal learning. The chapters in this handbook present and discuss topics that focus on spirituality as an integral part of human experience and consequently essential to educational programs which aim to address personal and communal identity, foster resilience, empathy and compassion, and promote meaning and connectedness.

Restorative Justice Today Katherine S. van Wormer, Lorenn Walker, 2012-08-17 *Restorative Justice Today: Applications of Restorative Interventions* takes a hard look at the issues and concepts surrounding restorative justice and current restorative practices used in a broad range of areas today. In a time when the cost of prisons and jails is on the rise, resulting in more offenders being kept out of the community, this timely and contemporary book exposes readers to a range of restorative practices that can be implemented. The authors, renowned experts in the area of restorative justice, provide information not found in other restorative justice texts.

Pantheism and Ecology Luca Valera, 2023-11-14 This book provides a comprehensive overview of the relationship between pantheism and ecology, particularly considering different cultural approaches and diverse religious, theological, and philosophical traditions. Environmental ethics arises from the dangerousness and harmfulness of human beings with respect to nonhuman species and more generally with respect to the environment. A common starting point for environmental ethics standpoints is that human beings are responsible for damaging nature. The famous four laws of ecology drafted by Barry Commoner precisely express this guilt on the part of human beings who very often voluntarily violate the behavioral indications that emerge from nature itself. These aspects concern environmental ethics outlooks. Eco-theology then takes a further step: not only do we damage the ecosystem, but also, as many authors suggest, when we humans destroy the natural world, we are wounding God. Such an idea implies a possible coincidence of God with the natural world or the ecosystem. From this assumption, different questions may emerge: what is the kind of coincidence between God and the natural world? Are God and the ecosystem coextensive? If so, are we re-sacralizing the natural world and grounding intrinsic values in theological postulates and statements? These questions lead us to reconsider the cosmological assumptions that ground our environmental judgements, from theology to different religious traditions and cultures to philosophical worldviews. In particular, we will focus on the cosmological assumptions of pantheism, considering its differences with panentheism, discussing the symmetrical or asymmetrical relationships between God and the finite ways in which God manifests Godself. In this regard, the book is divided into three main parts: in the first part, the question of pantheism is approached from different traditions and with a special focus on the main thinkers in the history of thought, from Greek Stoicism to the present day. In the second part, some current ecological concerns are considered in relation to pantheistic cosmology; the authors will deepen issues from the discussion of the different pan-conceptions to the problem of evil to the Anthropocene. Finally, in the third part, the different chapters will focus on ethical issues in the field of the current environmental crisis, with a huge connection with the pantheistic cosmologies. This book is oriented to a wide public interested in environmental issues and looking for an approach

from different cultures and traditions Evidently due to its academic nature this book is also intended to be a great support for researchers interested in eco theology and more specifically in the relationship between pantheism and ecology It is not in this sense a classic book on environmental ethics but a book that delves into the fundamentals of environmental philosophy privileging the Ibero American approach Handbook of African Philosophy Elvis Imafidon,Mpho Tshivhase,Björn Freter,2023-09-30 This Handbook provides in one volume rich comprehensive and rigorous coverage of specific subject areas and thematic concerns in the ever evolving academic discipline of African philosophy This Handbook is unique in its focus on central and emerging areas within African philosophy such as Afro communitarian philosophy ethics epistemology social and political philosophy existentialism philosophy of religion gender philosophy philosophy of education phenomenology transhumanism African philosophy futures and philosophy of the non human The thirty two chapters in this Handbook explore the rich textual and non textual forms of philosophical knowledge in Africa and adequately represent the broad and diverse scope of African philosophy showing the richness and depth of the philosophical tradition This reference work is indispensable to students and researchers in African philosophy comparative philosophy and world philosophies Making Humanities and Social Sciences Come Alive Deborah Green,Deborah Price,2019-02-14 Prepares readers to become high quality humanities and social sciences educators for early childhood and primary contexts **On Moral Law and Quest for Selfhood** Mohan Parasain,2016-07-15 This book offers an original intersection of concepts from Immanuel Kant s moral command ethics and S ren Kierkegaard s existential ethics The Kantian formulation of moral law is based on theoretical ground while Kierkegaardian ethics of the quest for selfhood views it as the very act of living The present work provides an account of both these perspectives and questions whether these approaches to morality are mutually exclusionary Using Slavoj i ek s parallax view in the realm of morality it argues that moral philosophy must engage with a constant critique of difference around which the transformation of our various perspectives to morality revolves This work appeals for furtherance of the conversation model and participation of perspectives to transcend positional confinement It advocates the traversing of the ethical parallax to allow for intellectual openness and an empathetic perception of the other Engaging and well researched this book will be of interest to scholars and researchers of ethics political philosophy and continental philosophy **Integral Ecology** Sean Esbjorn-Hargens, Ph.D.,Michael E. Zimmerman, Ph.D.,2011-03-08 Today there is a bewildering diversity of views on ecology and the natural environment With more than two hundred distinct and valuable perspectives on the natural world and with scientists economists ethicists activists philosophers and others often taking completely different stances on the issues how can we come to agreement to solve our toughest environmental problems In response to this pressing need Integral Ecology unites valuable insights from multiple perspectives into a comprehensive theoretical framework one that can be put to use right now The framework is based on Integral Theory as well as Ken Wilber s AQAL model and is the result of over a decade of research exploring the myriad perspectives on ecology available to us

today and their respective methodologies Dozens of real life applications and examples of this framework currently in use are examined including three in depth case studies work with marine fisheries in Hawai i strategies of eco activists to protect Canada s Great Bear Rainforest and a study of community development in El Salvador In addition eighteen personal practices of transformation are provided for you to increase your own integral ecological awareness Integral Ecology provides the most sophisticated application and extension of Integral Theory available today and as such it serves as a template for any truly integral effort

The Concept of Milieu in Environmental Ethics Layna Droz,2021-08-24 The Concept of Milieu in Environmental Ethics discusses how we can come together to address current environmental problems at the planetary level such as climate change biodiversity loss transborder pollution and desertification The book recognises the embedded individual sociocultural and environmental contexts that impact our everyday choices It asks in this pluralism of worldviews how can we build common ground to tackle environmental issues What is our individual moral responsibility within the larger collaborative challenge Through philosophical reasoning this book pragmatically addresses these questions and builds a framework to support sustainable ways of living At the core of the book it draws on the concept of milieu f do inspired by the Japanese philosopher Watsuji Tetsur which captures how we act within and perceive our surroundings as a web of culturally historically and geographically situated meanings and values It argues that the milieu connects us as individuals with community past and future history and the natural world providing us with common ground for global environmental ethics This book will be an engaging and interesting read for scholars researchers and students in environmental ethics philosophy and sustainability

On Moral Certainty, Justification and Practice J. Hermann,2015-06-23 Taking inspiration from the later Wittgenstein On Moral Certainty Justification and Practice explores the practical basis of human morality It offers an account of moral certainty which it links with a view of moral competence Drawing on everyday examples it is shown how morality is grounded in action not in reasoning

Human Behavior and the Social Environment, Macro Level Katherine S. Van Wormer,Fred H. Besthorn,2017 Unique to Human Behavior and the Social Environment Macro Level is the focus on the natural as well as physical environment in the study of human behavior and use of a trauma informed model in the study of social service organizations This is the only social work text to include a chapter on findings from social psychology relevant to human behavior

Colossians: An Earth Bible Commentary Victoria S. Balabanski,2020-01-23 Vicky Balabanski analyses Colossians as a co authored letter written during Paul s Roman imprisonment by Timothy with the input of Epaphras and sent with Paul s introductory and concluding greetings Balabanski sees remarkable resonances between the cosmology of this letter and that of Stoic thought the most widely held philosophy in first century Asia Minor Drawing upon the way Stoic thinkers saw the divine Spirit permeating reality and sought to attune their lives to the Logos divine reason she argues that the Logos of Christ the Gospel was welcomed by small groups of people

shaped by Stoic thought and they experienced Christ as the visible expression of the One God who permeates reality The Letter to the Colossians has the highest view of Christ of any of the New Testament writings and its theology of divine permeation invites us to notice the ecological potential of this letter This Eco Stoic reading brings contemporary ecological questions into dialogue with the distinctive Christology and cosmology of the letter *A Moral Defense of Recreational Drug Use* Rob Lovering, 2015-08-12 Why does American law allow the recreational use of some drugs such as alcohol tobacco and caffeine but not others such as marijuana cocaine and heroin The answer lies not simply in the harm the use of these drugs might cause but in the perceived morality or lack thereof of their recreational use Despite strong rhetoric from moral critics of recreational drug use however it is surprisingly difficult to discern the reasons they have for deeming the recreational use of some drugs morally wrong In this book Rob Lovering lays out and dissects various arguments for the immorality of using marijuana cocaine heroin and other drugs recreationally He contends that by and large these arguments do not succeed Lovering's book represents one of the first works to systematically present analyze and critique arguments for the moral wrongness of recreational drug use Given this as well as the popularity of the morality based defense of the United States drug laws this book is an important and timely contribution to the debate on the recreational use of drugs

Contemporary Anarchist Studies Randall Amster, Abraham DeLeon, Luis Fernandez, Anthony J. Nocella, II, Deric Shannon, 2009-02-10 This book highlights the recent rise in interest in anarchist theory and practice attempting to bridge the gap between anarchist activism on the streets and anarchist studies in the academia Bringing together some of the most prominent voices in contemporary anarchism in the academy it includes pieces written on anarchist theory pedagogy methodologies praxis and the future *The Deep Ecology Movement* Alan Drengson, Yuichi Inoue, 1995-02-02 Deep ecology a term coined by noted Norwegian philosopher Arne Naess is a worldwide grassroots environmental movement that seeks to redress the shallow and piecemeal approach of technology based ecology Its followers share a profound respect for the earth's interrelated natural systems and a sense of urgency about the need to make profound cultural and social changes in order to respond and sustain the long term health of the planet This comprehensive introduction to the Deep Ecology movement brings together Naess groundbreaking work with essays by environmental thinkers and activists responding to and expanding on its philosophical and practical aspects Contributors include George Sessions Gary Snyder Alan Drengson Dill Devall Freya Matthews Warwick Fox David Rothenberg Michael E Zimmerman Patsy Hallen Dolores LaChapelle Pat Fleming Joanna Macy John Rodman and Andrew McLaughlin The Authors offer diverse viewpoints from ecofeminist scientific and purely philosophical approaches to Christian Buddhist and Gandhian based principles Their essays show how social technological psychological philosophical and institutional issues are all fundamentally related to our attitudes and values toward the natural world
